# SEED TRADE BUYERS GUIDE & DIRECTORY

• 1933 •

PUBLISHED **SEED WORLD** CHICAGO  
BY 325 W. HURON ST. ILL.

SIXTEENTH EDITION

*Kenneth  
H. Hoff*

**Black  
Leaf 40**

TOBACCO BY-PRODUCTS &  
CHEMICAL CORPORATION  
INCORPORATED • LOUISVILLE, KY.

## "Black Leaf 40"

*used the World around. For over two  
decades the accepted leader.*

Controls Aphis, Red Bug, Leaf  
Hopper, Thrips and many  
other insects which attack  
plants, shrubs, flowers, trees,  
animals and poultry.

Widely used for poultry lice  
and mites. Just "paint" it on  
the roosts. Effective flock  
treatment.

No seed store stock complete without  
"Black Leaf 40"—40% nicotine—seven  
sizes. You can stake your reputation  
upon the strength, uniformity and per-  
formance of "Black Leaf 40." Your  
jobber has it.

# DUTOX

REG. U. S. PAT. OFF.

## A Non-Arsenical Insecticide

### *For Vegetables, Fruits and Tobacco—*

The demand for this nationally known fluorine compound is increasing enormously (practically doubling each year) among commercial growers and home gardeners in practically every state.

Gardeners and experimenters have long wanted a practical *non-arsenical* control . . . that won't injure plants or impair fertility of the soil and yet kills beetles, and leaf-eating insects on vegetables, fruit and tobacco. DUTOX meets these needs fully (dust or spray).

DUTOX kills the Mexican Bean Beetle, Striped Cucumber Beetle, Asparagus Beetle, Tobacco Flea Beetle, Potato Flea Beetle, Eggplant Beetle, Blister Beetle, Cabbage Looper, Cabbage Worm, Tomato Fruit Worm, Codling Moth and other insects, many not controlled heretofore by other insecticides.

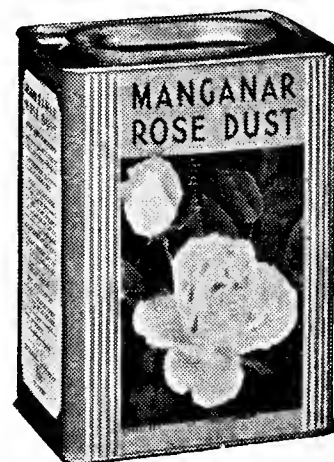

DUTOX sold in 1-lb. cans — also 1-lb. and 6-lb. bags.

### *For Flowers—*

## MANGANAR ROSE DUST

*prevents Black Spot, Brown Canker, Mildew, and Controls Red Spider and Most Leaf-Eating Insects on Roses.*

These insects and diseases are increasingly prevalent. No rose is entirely immune. Hence *Manganar Rose Dust* is a quick and easy seller.

*Manganar Rose Dust* is the only rose dust which contains Manganese Arsenate—a highly efficient material which is largely responsible for its leading position. Economical to use—easy to apply. Also effective on snapdragons, asters, hollyhocks, carnations, and other flowers.

Packed in 100-lb. drums; 5-lb. cartons; 1-lb. canisters. Ask your jobber or write us.

# Seed Trade Buyer's Guide

Registered U. S. Patent Office

## For 1933

Compiled and Published to Promote Better Business for  
Seed Merchants Everywhere.

Containing Classified Listings of Seed Growers, Wholesalers,  
Manufacturers of Equipment, Supplies and  
Side-Line Merchandise.

Containing an Alphabetical List of Trade Marks and Slogans  
Used by Seedsmen and Manufacturers of Allied Lines

Containing Five Charts of Common Weed Seeds, Tables of  
Seed Exports and Imports, Tariff Rates, Planting and  
Spraying Tables, Information on Sidelines and  
Other Data of Interest to the Seed Trade.  
For Index Refer to Page 4.

It has been the endeavor of the publishers to limit the listings  
to actual growers, wholesalers or manufacturers who  
are generally recognized in the trade as being  
privileged to such classification. For index  
refer to page 4.

The publication of this book is made possible through the  
support of the advertisers whose names appear in  
black face type in the directory section.

# NOXIOUS WEED SEEDS

**P**RACTICALLY all of the State Seed Laws name some noxious weed seeds. The sale of agricultural seed containing any of the noxious weed seeds is prohibited in some of the states. Most states, however, allow a very small percentage to be present. Regulations vary in the different states. Any seedsman interested in the regulations of any particular state should write directly to that state for a copy of the seed law. (See table on page 35.)

Alabama.....	Wild Onion, Bermuda Grass, Quack Grass, Dodder, Johnson Grass, Nut Grass, Canada Thistle, Hawkweed, Corn Cockle, Chicory.
Arizona.....	Dodders, Russian Thistle, Johnson Grass, Bermuda Grass, Florida Nut Grass, Wild Mustard, Careless Weed, Wild Oats, Lamb's Quarter, Wild Barley, Rag Weed, Burr Grasses.
Arkansas.....	Dodders, Buckhorn, Plantains, Sorrels, Docks, Cheat, Red Rice, Wild Carrot, Wild Onion, Thistle, Nut Grass Johnson Grass, Whitetop.
California*....	Johnson Grass, Camel's Thorn, Hoary Cress, Morning Glory, Canada Thistle, Russian Knapweed.
Colorado.....	Dodders, Wild Oats, Plantains, Bindweed, Poverty Weed, Crab Grass, Cheat, Canada Thistle, Cockle, Sow Thistle, Wild Barley, Hopelover.
Connecticut....	Quack Grass, Canada Thistle, Plantain, Hawkweed, Dodder, Curled Dock.
Delaware.....	Quack Grass, Canada Thistle, Dodders, Wild Mustard, Wild Oats, Orange Hawkweed.
Idaho.....	Wild Mustards, Quack Grass, Canada Thistle, Wild Oats, Dodders, Corn Cockle, Buckhorn Plantain, Bracter Plantain, Perennial Sow Thistle, French Weed, Hoary Cress, Wild Morning Glory, Spurge, Puncture Vine, Yellow Toadflax, Russian Knapweed.
Illinois.....	Canada Thistle, Quack Grass, Wild Mustard, Wild Carrot, Dodder, Dock, Buckhorn Plantain, Ox-eye Daisy, Field Sorrel, Johnson Grass.
Indiana.....	Buckhorn, Bracted Plantain, Canada Thistle, Chicory, Common Plantain, Corn Cockle, Curled Dock, Dodder, Horse Nettle, Mustard, Ox-eye Daisy, Prickly Lettuce, Quack Grass, Red Sorrel, Whitetop, Wild Carrot, Wild Onion, Yellow Trefoil.
Iowa.....	Wild Mustard, Indian Mustard, Sow Thistle, Dock, Wild Oat, Corn Cockle, Sheep Sorrel, Canada Thistle, Quack Grass, Buckhorn, Wild Carrot, Horse Nettle, Dodder.
Kansas.....	Dodders, Johnson Grass, Field Bindweed, Canada Thistle, Corn Cock, Buckhorn Plantain, Wild Mustard, French Weed, Quack Grass, Wild Parsnips, Wild Onions.
Kentucky.....	Quack Grass, Dodders, Sorrel, Buckhorn, Corn Cockle, Wild Onion, Canada Thistle.
Louisiana.....	Not specified in law—determined by State Department of Agriculture.
Maine.....	None listed in law itself—large list named in Bulletins.
Maryland.....	Wild Onion, Bermuda Grass, Quack Grass, Dodder, Canada Thistle, Hawkweed, Chicory.
Massachusetts..	Dodder, Quack Grass, Wild Mustard, Canada Thistle.
Michigan.....	Quack Grass, Dodders, Canada Thistle, Wild Carrot, Mustards.
Minnesota.....	Quack Grass, Canada Thistle, Perennial Sow Thistle, Dodders, Leafy Spurge, Ox-eye Daisy, Buckhorn Plantain.
Mississippi....	Wild Onion, Bermuda Grass, Quack Grass, Dodder, Johnson Grass, Nut Grass, Canada Thistle, Hawkweed, Corn Cockle, Chicory.
Missouri.....	Quack Grass, Dodders, Russian Thistle, Wild Carrot, Sorrels, Docks, Wild Onion, Buckhorn and other varieties of Plantain.
Montana.....	Quack Grass, Fan Weed, Wild Oats, Dodder, Canada Thistle.
Nebraska.....	Small Flowered Morning Glory, Wild Mustard, Quack Grass, Wild Oats, Dodders.
Nevada.....	Dodder, Star Thistle, Thistles, Russian Thistle, Hoary Cress, Morning Glory, Johnson Grass, Nut Grass, Creeping Mallow, St. Johnswort, Dandelion, Water Cress, Puncture Vine, Mustard.
New Hampshire	No noxious weeds named.
New Jersey....	Canada Thistle, Dodders, Quack Grass, Horse Nettle, Russian Knapweed.
New Mexico...	Quack Grass, Fan Weed, Mustard, Wild Oats, Dodder.
New York.....	Quack Grass, Wild Mustards, Canada Thistle, Dodder, Crab Grasses, Docks.
North Carolina.	Wild Onion, Wild Garlic, Dodder, Wild Oats, Corn Cockle, Cheat.
North Dakota..	Quack Grass, Canada Thistle, Perennial Sow Thistle, Dodder, Leafy Spurge, Field Bindweed.
Ohio.....	Canada Thistle, Wild Onion, Quack Grass, Dodders, Plantains, Wild Carrot, Ox-eye Daisy, Corn Cockle, Docks, Chicory.
Oklahoma.....	Dodder, Russian Thistle, Bind Weed, Johnson Grass, Canada Thistle, Perennial Bull Nettle.

## NOXIOUS WEED SEEDS—Continued

Oregon.....	Charlock, Dodder, Wild Oats, Corn Cockle, Canada Thistle, Quack Grass.
Pennsylvania...	Wild Onion, Quack Grass, Canada Thistle, Devil's Paint Brush, King Devil, Perennial Sow Thistle, Horse Nettle, Bindweed.
Rhode Island..	Quack Grass, Canada Thistle, Didders, Wild Mustards, Crab Grasses, Docks, Corn Cockle, Buckhorn, Wild Carrot.
South Carolina.	Clover Dodder, Field Dodder, White Mustard, Wild Oats.
South Dakota..	Quack Grass, Canada Thistle, Dodder.
Tennessee.....	Wild Mustard, Quack Grass, Canada Thistle, Wild Oats, Didders, Cockle, Sour Dock, Ox-eye Daisy, Wild Onion, Johnson Grass.
Texas.....	Dodder, Johnson Grass, Russian Thistle, Bindweed, Blue Weed, Wire Grass, Bermuda Grass.
Utah.....	Mustard, Whitetop, Plantain, Dodder, Canada Thistle, Wild Oats, Bull Thistle, Ragweed, Wild Morning Glory, Burdock.
Vermont.....	Quack Grass, Mustards, Canada Thistle, Dodder, Ergot, Corn Cockle, Poison Hemlock.
Virginia.....	Quack Grass, Wild Onion Bulblets, Canada Thistle, Dodder, Bermuda Grass, Hawkweed, Perennial Sow Thistle, Johnson Grass.
Washington....	Quack Grass, Dodder, Fan Weed, Wild Morning Glory, Canada Thistle, Corn Cockle, Russian Thistle, Charlock, Jim Hill Mustard, Buckhorn Plantain, Darnel, Perennial Sow Thistle.
West Virginia..	Wild Onion, Johnson Grass, Quack Grass, Canada Thistle, Hawkweed, Buckhorn, Sow Thistle, Wild Mustard, Corn Cockle, Ox-eye Daisy, Indian Mustard, Star Thistle, Wild Carrot, Galinsoga.
Wisconsin.....	Canada Thistle, Quack Grass, Didders, Wild and Indian Mustard, Buckhorn, Wild Oats, Corn Cockle, Ox-eye Daisy, Snapdragon, Sow Thistle.
Wyoming*.....	Wild Mustard, Quack Grass, Canada Thistle, Corncock, Dodder.

\*Other secondary noxious weed seeds named.

## PLATE 1.—NOXIOUS WEED SEEDS FOUND IN FARM SEEDS

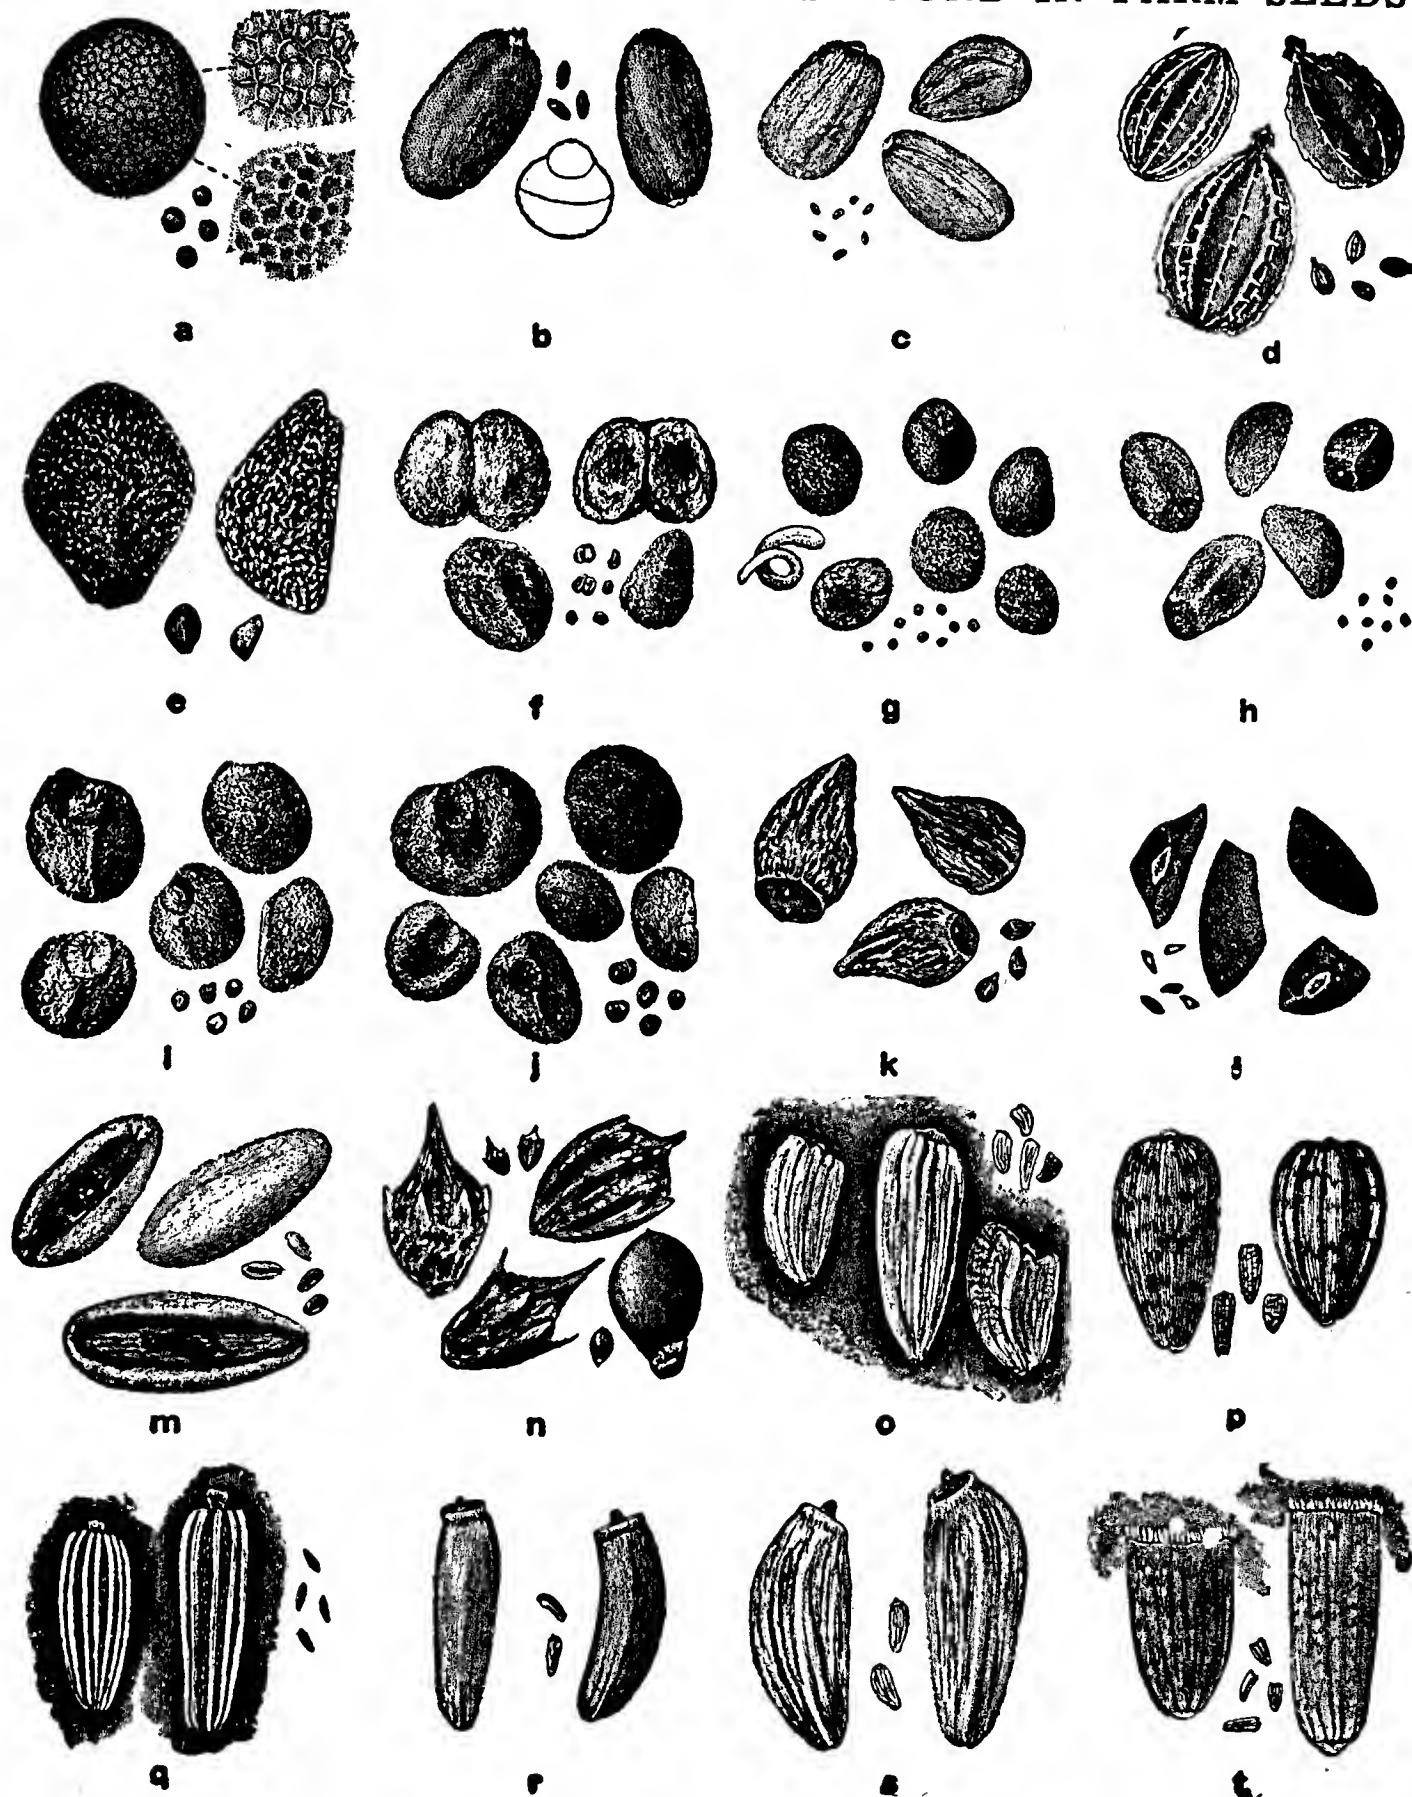

## Common and Botanical Names. 1—Color. 2—Appearance Under Low-power Lens

- a. Sandbur, *Cenchrus tribuloides*, (1) Light brown or straw, (2) Dull.
- b. Wild oat, *Avena fatua*, (1) Straw or brown, (2) Smooth.
- c. Chess or cheat, *Bromus secalinus*, (1) Straw, (2) Somewhat wrinkled.
- d. Darnel, *Lolium temulentum*, (1) Straw or brown, (2) Smooth; sometimes shiny.
- e. Quack-grass, *Agropyron repens*, (1) Light yellow, sometimes greenish, (2) Dull.
- f. Curled dock, *Rumex crispus*, (1) Reddish brown, (2) Smooth and shiny.
- g. Black bindweed, *Polygonum convolvulus*, (1) Brown, straw or greenish in coat; out of coat, black, and (2) somewhat shiny.
- h. Russian thistle, *Salsola tragus*, (1) Grey or brown.
- i. Corn cockle, *Agrostemma githago*, (1) Black, (2) Rough.
- j. White campion, *Lychnis alba*, (1) Grey, yellowish grey or reddish grey, (2) Fine spines or tubercles.
- k. Bladder campion, *Silene vulgaris*, (1) Brown or approaching black, (2) Fine spines or tubercles.
- l. Night-flowering catchfly, *Silene noctiflora*, (1) Similar to that of "j," (2) Fine spines or tubercles.
- m. Cow Cockle, *Vaccaria vaccaria*, (1) Black, (2) Faintly warted.
- n. Pennycress, *Thlaspi arvense*, (1) Reddish brown, (2) concentric shining ridges.
- o. Field peppergrass, *Lepidium campestre*, (1) Reddish brown, (2) Dull or finely granular.
- p. Large-fruited false flax, *Camelina sativa*, (1) Light yellow or orange, (2) Waxy.
- q. Small-fruited false flax, *Camelina microcarpa*, (1) Dark red, (2) Dull; finely granular.
- r. Ball mustard, *Neslia paniculata*, (1) Straw colored or brown, (2) Network of ridges.
- s. Black mustard, *Brassica nigra*, (1) Reddish or dark brown, (2) Network of ridges.
- t. Charlock, *Brassica arvensis*, (1) Black or reddish brown, (2) Dull; grey lustre.

—Bureau of Plant Industry, U. S. Dept. of Agric.

## PLATE 2.—NOXIOUS WEED SEEDS FOUND IN FARM SEEDS

## Common and Botanical Names. 1—Color. 2—Appearance Under Low-power Lens

- a. Indian mustard, *Brassica juncea*, (1) Reddish brown, (2) Network of ridges.
- b. Hare's-ear mustard, *Conringia orientalis*, (1) Brown or reddish brown, (2) Granular.
- c. Tumbling mustard, *Sisymbrium altissimum*, (1) Orange or dull brown, (2) Waxy.
- d. Wild carrot, *Daucus carota*, (1) Light brown, (2) Ridges with spines.
- e. Field bindweed, *Convolvulus arvensis*, (1) Dull brown, (2) Roughened.
- f. Flax dodder, *Cuscuta epilinum*, (1) Grey or brownish grey, (2) Granular.
- g. Clover dodder, *Cuscuta epithymum*, (1) Grey or brown, (2) Granular.
- h. Small-seeded alfalfa dodder, *Cuscuta planiflora*, (1) Yellowish, greenish or purplish, (2) Roughened or granular.
- i. Field dodder, *Cuscuta arvensis*, (1) Orange or yellowish brown, (2) Dull or granular.
- j. Large-seeded alfalfa dodder, *Cuscuta indecora*, (1) Grey, greenish or brown, (2) Roughened or granular.
- k. Corn gromwell, *Lithospermum arvense*, (1) Grey or brown, (2) Roughened or warty.
- l. Rugel's plantain, *Plantago Rugelii*, (1) Black, (2) Dull with minute glistening points.
- m. Buckhorn plantain, *Plantago lanceolata*, (1) Brown or amber, (2) Shiny on concave side; dull in groove.
- n. Ragweed, *Ambrosia artemisiaefolia*, (1) Light grey or brown, (2) Irregularly ridged.
- o. Gum-plant, *Grindelia squarrosa*, (1) Whitish or straw, (2) Vertically wrinkled.
- p. Sunflower, *Helianthus annuus*, (1) Grey or brown with black or dark mottlings, (2) Fine vertical wrinkles.
- q. Oxeye daisy, *Chrysanthemum leucanthemum*, (1) Brown or black with ten white vertical ribs.
- r. Canada thistle, *Carduus arvensis*, (1) Light or dark bronze, (2) Smooth.
- s. Bullthistle, *Carduus lanceolatus*, (1) Light grey or brown with darker vertical stripings, (2) Dull.
- t. Chicory, *Cichorium intybus*, (1) Brown or straw with dark spots, (2) Vertically wrinkled; finely webbed.

—Bureau of Plant Industry, U. S. Dept. of Agric.

## PLATE 3.—COMMON WEED SEEDS FOUND IN FARM SEEDS

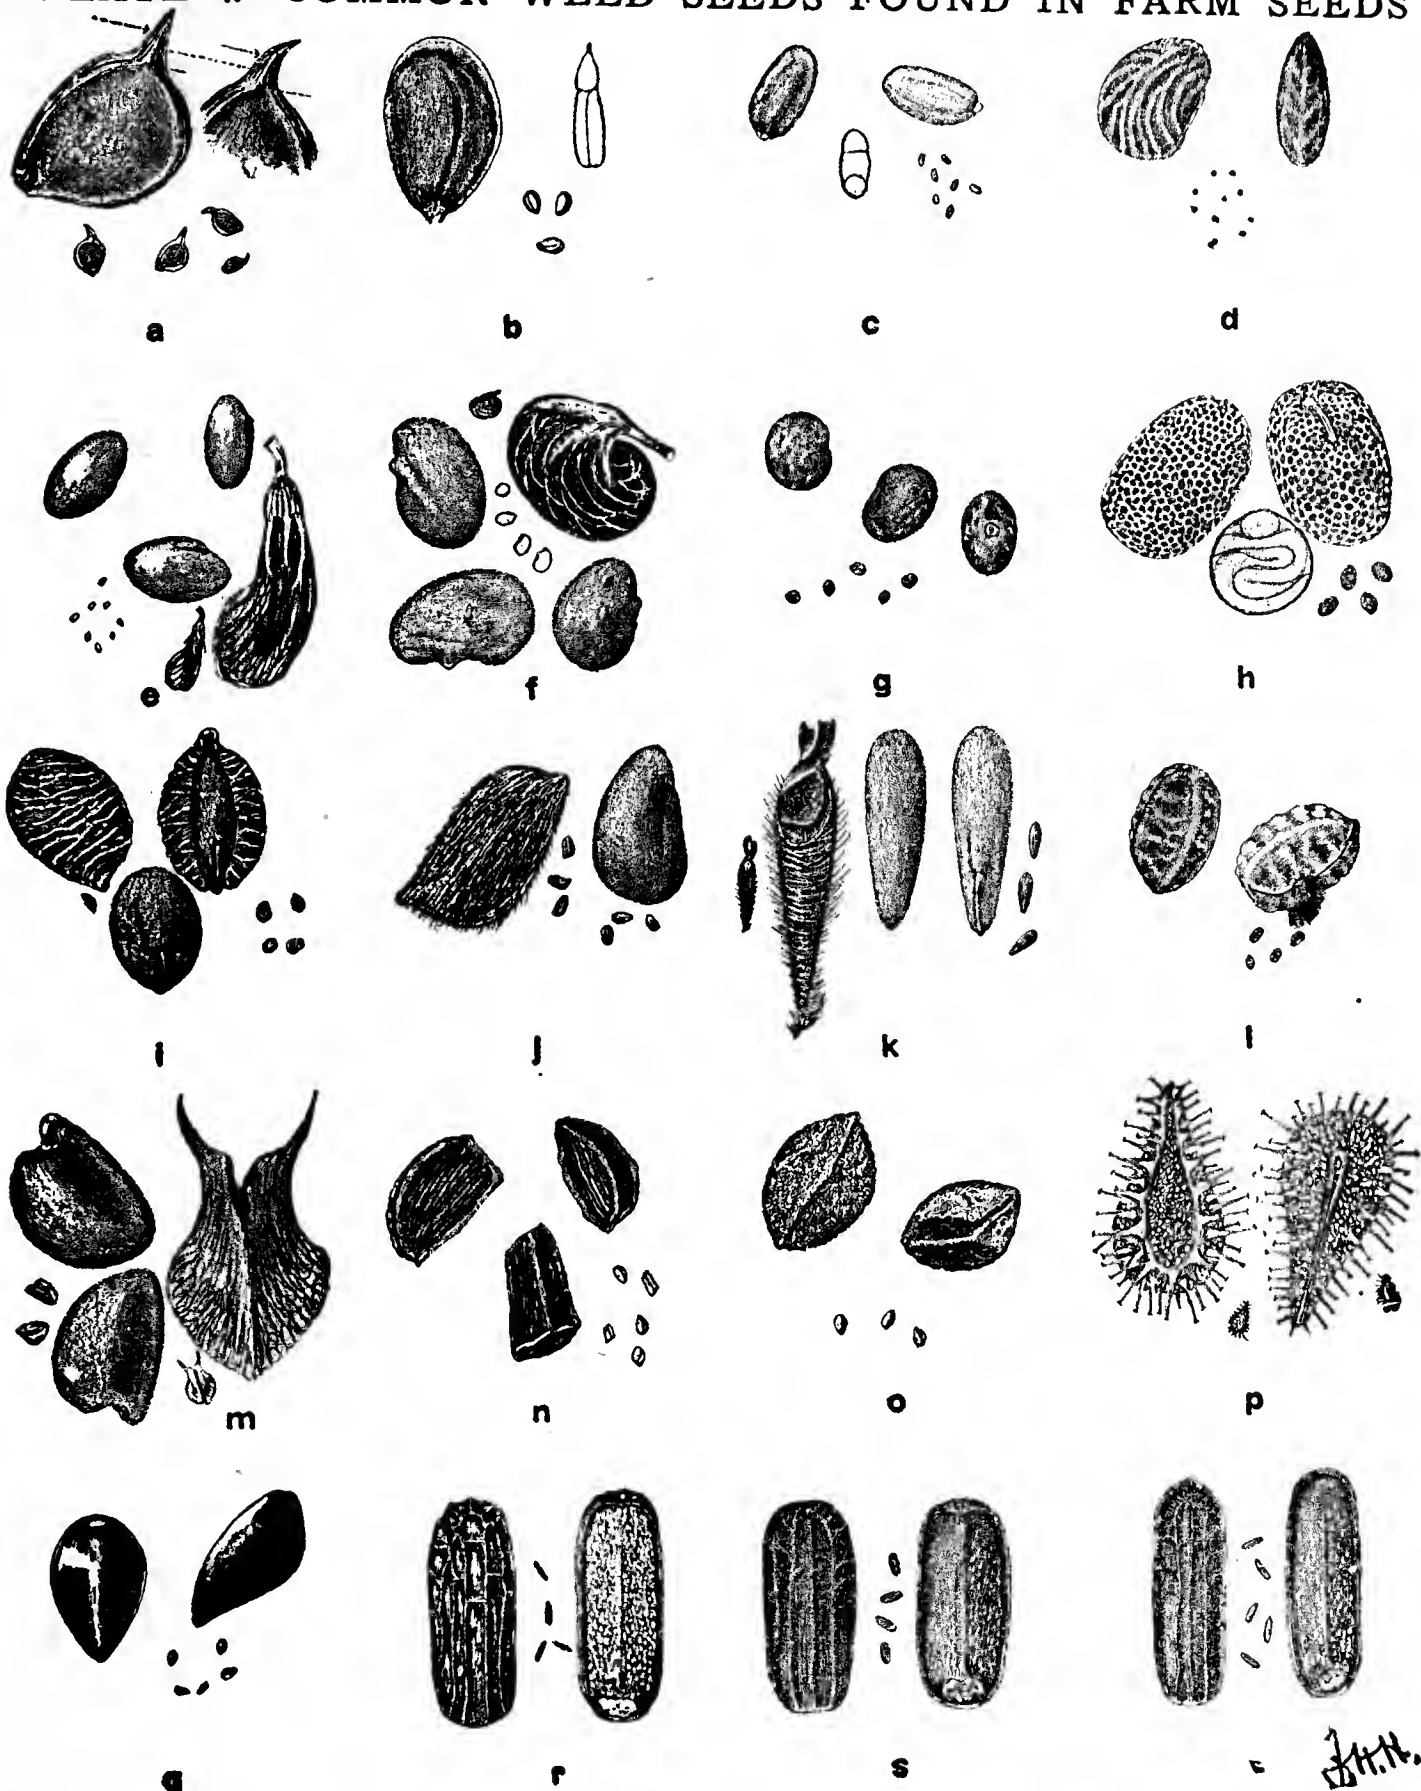

## Common and Botanical Names. 1—Color. 2—Appearance Under Low-power Lens

- a. Crab-grass, *Syntherisma sanguinalis*, (1) Straw green, brown or purplish.  
 b. Witch-grass, *Panicum capillare*, (1) Straw or olive green, (2) Shining.  
 c. Yellow foxtail, *Chaetochloa glauca*, (1) Free from chaff, light or dark green, (2) Ridged crosswise.  
 d. Green foxtail, *Chaetochloa viridis*, (1) Free from chaff; straw or brown, sometimes mottled, (2) Ridged crosswise.  
 e. Velvet grass, *Holcus lanatus*, (1) Chaff, straw, (2) Having fine, stiffish hairs.  
 f. Soft chess, *Bromus hordeaceus*, (1) Straw, (2) Usually wrinkled.  
 g. Sedge, *Carex* sp., (1) Free from chaffy hull, light brown, (2) Smooth.  
 h. Sorrel, *Rumex acetosella*, (1) Free from hull, reddish brown, (2) Smooth and shining.  
 i. Knotweed, *Polygonum aviculare*, (1) Free from covering, reddish brown, (2) Dull.  
 j. Pale smartweed, *Polygonum lapathifolium*, (1) Chestnut brown, (2) Shining.  
 k. Lady's-thumb, *Polygonum persicaria*, (1) Black or reddish black, (2) Shining.  
 l. Lamb's-quarters, *Chenopodium album*, (1) Dark brown or black, (2) Shining.  
 m. Wild saltbush, *Atriplex truncata*, (1) Straw, (2) Veined into an imperfect network.  
 n. Rough pigweed, *Amaranthus retroflexus*, (1) Black, (2) Highly polished.  
 o. Spreading amaranth, *Amaranthus blitoides*, (1) Black, (2) Highly polished.  
 p. Spargula arvensis, Spurry, (1) Dull black, encircled by light colored rim, (2) Finely warted.  
 q. Chickweed, *Alsine graminea*, (1) Reddish brown or brown, (2) Crinkled appearance, caused by fine ridges.  
 r. Chickweed, *Alsine media*, (1) Reddish brown or brown, (2) Stitched appearance caused by tubercles.  
 s. Mouse-ear chickweed, *Cerastium vulgatum*, (1) Reddish brown, (2) Tubercled.  
 t. Forked catchfly, *Silene dichotoma*, (1) Reddish brown, (2) Fine spines or tubercles.

—Bureau of Plant Industry, U. S. Dept. of Agric.

## PLATE 4.—COMMON WEED SEEDS FOUND IN FARM SEEDS

## Common and Botanical Names. 1—Color. 2—Appearance Under Low-power Lens

- a. Creeping buttercup, *Ranunculus repens*, (1) Brown or reddish-brown, (2) Dull.  
b. Peppergrass, *Lepidium virginicum*, (1) Reddish yellow with papery rim, (2) Waxy or dull.  
c. Shepherd's-purse, *Bursa bursa-pastoris*, (1) Reddish yellow, (2) Waxy or dull.  
d. Cinquefoil, *Potentilla monspeliensis*, (1) Straw or brown, (2) With curved, forked ridges.  
e. Hop clover, *Trifolium procumbens*, (1) Yellowish, (2) Shining.  
f. Yellow trefoil, *Medicago lupulina*, (1) Yellowish brown or tinged with green, (2) Smooth.  
g. Bird's-foot trefoil, *Lotus corniculatus*, (1) Brown and mottled, (2) Smooth.  
h. Wild Geranium (cut-leaved crane's bill), *Geranium dissectum*, (1) and (2) Brown with light network.  
i. Wild Geranium (Dove's foot crane's bill), *Geranium molle*, (1) and (2) Often with a brown, ridged hull.  
j. Wild Geranium (Small-flowered crane's bill), *Geranium pusillum*, (1) Reddish brown, (2) Smooth.  
k. Alfalfa, *Erodium cicutarium*, (1) Seeds proper, brown, (2) Smooth.  
l. Spurge, *Euphorbia nutans*, (1) Steel-grey or brown, (2) Ridged into four angles; faces wrinkled.  
m. Spiny sida, *Sida spinosa*, (1) Brown, (2) Dull.  
n. Evening primrose, *Onagra biennis*, (1) Reddish brown, (2) Presenting wrinkled or shriveled appearance.  
o. Red Pimpernel, *Anagallis arvensis*, (1) Reddish brown, (2) Finely roughened.  
p. Sticktight, *Lappula lappula*, (1) Grey or brown, (2) With whitish warts and brown, barbed, prickles.  
q. Forget-me-not, *Myosotis arvensis*, (1) Black, (2) Shining.  
r. Vervain, *Verbena officinalis*, (1) Reddish or dark brown, (2) Veined on one side, angled on other.  
s. White Vervain, *Verbena urticaefolia*, (1) Reddish or dark brown, (2) Veined on one side, angled on other.  
t. Blue Vervain, *Verbena hastata*, (1) Reddish or dark brown, (2) Veined on one side, angled on other.

—Bureau of Plant Industry, U. S. Dept. of Agric.

## PLATE 5.—COMMON WEED SEEDS FOUND IN FARM SEEDS

## Common and Botanical Names. 1—Color. 2—Appearance Under Low-power Lens

- a. Catmint, *Nepeta cataria*, (1) Reddish or dark brown, (2) Smooth and dull.
- b. Healall, *Prunella vulgaris*, (1) Light to dark brown, (2) Slightly roughened, having a diffused lustre.
- c. Rough-leaved toad flax, *Elatinoides spuria*, (1) Light Brown, (2) Wrinkled.
- d. Plantain, *Plantago major*, (1) Greenish brown or black, (2) Roughened by slender wavy lines.
- e. Bracelet plantain, *Plantago aristata*, (1) Light or dark brown, (2) Dull.
- f. Dwarf plantain, *Plantago virginica*, (1) Light brown.
- g. Blue field madder, *Sherardia arvensis*, (1) Dull brown, (2) With small white hairs.
- h. Cleavers, *Galium aparine*, (1) Grey or brown, (2) With hair bearing tubercles.
- i. Wild corn salad, *Valerianella morrisonii*, (1) Brown, (2) Quite smooth.
- j. Wild corn salad, *Valerianella* sp., (1) Brown, (2) Somewhat hairy.
- k. Poverty weed, *Iva axillaris*, (1) Rusty Brown, (2) Somewhat roughened.
- l. Brown-eyed Susan, *Rudbeckia hirta*, (1) Black, (2) Having fine vertical ridges.
- m. Mayweed, *Anthemis cotula*, (1) Straw or brown, (2) Having warted ridges.
- n. Field camomile, *Anthemis arvensis*, (1) Whitish, light or dark brown, (2) Vertically grooved.
- o. Scentless camomile, *Matricaria inodora*, (1) Black, (2) Rough and ribbed.
- p. Cornflower, *Centaurea cyanus*, (1) Body of seed, bluish grey, (2) Smooth. Brush of bristles, light reddish yellow.
- q. Cat's-ear, *Hypochaeris radicata*, (1) Body of seed, reddish brown and (2) Rough.
- r. Oxtongue, *Picris echioides*, (1) Reddish yellow, (2) Darker transverse ridges.
- s. Hawkweed picris, *Picris hieracioides*, (1) Reddish brown, (2) Darker transverse ridges.
- t. Orange picris, *Hieracium aurantiacum*, (1) Black, (2) Ridged lengthwise; bearing tuft of white bristles.

## THE H. V. MODEL SPECIFIC GRAVITY SEPARATOR

Increases Profits by eliminating contamination and salvaging good material from your commodity. The HV Model Specific Gravity Separator is especially designed to remove contaminating elements from any dry commodity. Eliminating contamination naturally increases the value of any commodity, and adds extra profits. In the preparation of any commodity, such as seeds, there is a certain amount thrown away as waste. That waste contains good material which the HV model will salvage. The added profits from this salvaging alone often allows the HV model to pay for itself. How can you lose on an investment that pays for itself?

## PRICES AND TERMS

Upon receipt of information as to the commodity you desire to work on and the daily capacity required, we will be pleased to recommend the proper size and model of separator suitable for your work. We will also quote price and supply other desirable data. To well rated firms we are prepared to grant very easy terms, and where deferred payments are arranged we carry our own paper. Please make all requests on your business letter-head.

*The Grand Junction Seed Co.*  
MOUNTAIN ALFALFA SEED  
Grand Junction Colo.

March 17 1931.

Sutton, Steele & Steele Inc.  
Dallas, Texas.

Dear Sirs:

We were somewhat dubious when we read through many of the testimonials that your Mr. Steele gave us at the time we purchased one of your gravity machines. However after we got the machine up and in operation we could easily understand the enthusiasm shown in many of the letters. You can add us to your list of satisfied users who could not sell our machine for double the price we paid for it if we could not secure another one.

We had problems here in handling our sweet Corn and lettuce and carrot seed which it seemed almost impossible for us to solve until we secured your machine.

We feel that we can recommend your machine highly to anyone in the seed business, for they can certainly find many uses for it in handling seeds of almost any nature.

Yours truly,  
THE GRAND JUNCTION SEED COMPANY

# New Tariff Rates Now in Effect

Approved by U. S. Congress, June 17, 1930

*The following paragraphs from the Tariff Act of 1930 pertain to  
Seeds, Bulbs and Nursery Stock*

**Par. 722. Barley**, hulled or unhulled, 20 cents per bushel of forty-eight pounds; barley malt, 40 cents per one hundred pounds; pearl barley, patent barley and barley flour, 2 cents per pound.

**Par. 723. Buckwheat**, hulled or unhulled, 25 cents per one hundred pounds; buckwheat flour and grits or groats, one-half of one cent per pound.

**Par. 724. Corn** or maize, including cracked corn, 25 cents per bushel of fifty-six pounds; corn grits, meal, and flour, and similar products, 50 cents per one hundred pounds.

**Par. 726. Oats**, hulled or unhulled, 16 cents per bushel of thirty-two pounds; unhulled ground oats, 45 cents per one hundred pounds; oatmeal, rolled oats, oat grits, and similar oat products, 80 cents per one hundred pounds.

**Par. 727. Paddy or rough rice**, 1½ cents per pound; brown rice (hulls removed, all or in part), 1½ cents per pound; milled rice (bran removed, all or in part), 2½ cents per pound; broken rice, which will pass readily through a metal sieve perforated with round holes five and one-half sixty-fourths of one inch in diameter, and rice meal, flour, polish, and bran, five-eighths of 1 cent per pound.

**Par. 728. Rye**, 15 cents per bushel of fifty-six pounds; rye malt, 40 cents per one hundred pounds; rye flour and meal, 45 cents per one hundred pounds.

**Par. 729. Wheat**, 42 cents per bushel of sixty pounds; wheat, unfit for human consumption, 10 per centum ad valorem; wheat flour, semolina, crushed or cracked wheat, and similar wheat products not specially provided for, \$1.04 per one hundred pounds.

## Bulbs

**Par. 753. Tulip bulbs**, \$6 per thousand; hyacinth bulbs, \$4 per thousand; lily bulbs, \$6 per thousand; narcissus bulbs, \$6 per thousand; crocus corms, \$2 per thousand; lily of the valley pips, \$6 per thousand; all other bulbs, roots, rootstocks, clumps, corms, tubers and herbaceous perennials, imported for horticultural purposes, 30 per centum ad valorem.

## Nursery Stock

**Par. 754. Seedlings** and cuttings of Manetti, multiflora, brier, rugosa, and other rose stock, all the foregoing not more than three years old, \$2 per thousand; rose plants, budded, grafted, or grown on their own roots, 4 cents each; cuttings, seedlings, and grafted or budded plants of other deciduous or evergreen ornamental trees, shrubs, or vines, and all nursery or greenhouse stock, not specially provided for, 25 per centum ad valorem.

**Par. 755. Seedlings**, layers, and cuttings of apple, cherry, pear, plum, quince, and other fruit stocks, \$2 per thousand; grafted or budded fruit trees, cuttings and seedlings of grapes, currants, gooseberries, or other fruit vines, plants or bushes, 25 per centum ad valorem.

**Par. 762. Oil-bearing seeds** and materials: Castor beans, one-half of 1 cent per pound; flaxseed, 65 cents per bushel of fifty-six pounds; poppy seed, 32 cents per one hundred pounds; sunflower seed, 2 cents per pound; apricot

and peach kernels, 3 cents per pound; soy beans, 2 cents per pound; cottonseed, one-third of 1 cent per pound.

## Farm Seeds

**Par. 763. Grass seeds** and other forage crop seeds: Alfalfa, 8 cents per pound; alsike clover, 8 cents per pound; crimson clover, 2 cents per pound; red clover, 8 cents per pound; white and ladino clover, 6 cents per pound; sweet clover, 4 cents per pound; clover, not specially provided for, 3 cents per pound; millet, 1 cent per pound; orchard grass, 5 cents per pound; rye grass, 3 cents per pound; timothy, 2 cents per pound; hairy vetch, 3 cents per pound; other vetch, 1½ cents per pound; bent-grass (genus agrostis), 40 cents per pound; bluegrass, 5 cents per pound; tall oat, 5 cents per pound; all other grass and forage crop seeds not specially provided for, 2 cents per pound: "Provided"—That no allowance shall be made for dirt or other impurities in seed of any kind.

## Garden Seeds

**Par. 764. Other garden and field seeds**: Beet (except sugar beet), 4 cents per pound; cabbage, 12 cents per pound; canary, 1 cent per pound; carrot, 4 cents per pound; cauliflower, 25 cents per pound; celery, 2 cents per pound; kale, 6 cents per pound; kohlrabi, 8 cents per pound; mangelwurz, 4 cents per pound; mushroom spawn, 1 cent per pound; onion, 15 cents per pound; parsley, 2 cents per pound; parsnip, 4 cents per pound; pepper, 15 cents per pound; radish, 6 cents per pound; spinach, 1 cent per pound; tree and shrub, 8 cents per pound; turnip, 5 cents per pound; rutabaga, 5 cents per pound; flower, 6 cents per pound; all other garden and field seeds not specially provided for, 6 cents per pound: "Provided"—That the provisions for seeds in this schedule shall include such seeds whether used for planting or for other purposes.

## Beans and Peas

**Par. 765. Beans**, not specially provided for, and black-eye cow-peas: Green or unripe, 3½ cents per pound; dried, 3 cents per pound; in brine, 3 cents per pound; prepared or preserved in any manner, 3 cents per pound on the entire contents of the container.

**Par. 767. Lentils**, one-half of 1 cent per pound; lupines, one-half of 1 cent per pound.

**Par. 769. Peas** and chickpeas or garbanzos: Green or unripe, 3 cents per pound in the case of peas, and, in the case of chickpeas or garbanzos, 2 cents per pound; dried, 1¾ cents per pound; split, 2½ cents per pound; prepared or preserved in any manner, 2 cents per pound on the entire contents of the container.

**Par. 1727. Oil-bearing seeds** and nuts: Copra, hempseed, kapok seed, palm nuts, palm-nut kernels, tung nuts, rapeseed, rubber seed, perilla and sesame seed; seeds and nuts, not specially provided for, when the oils derived therefrom are free of duty. (See following note.)

Note: In the opinion of the American Seed Trade Association counsel, Curtis Nye Smith, Esq., seedsmen should declare hempseed and all varieties of rapeseed under this Par. 1727, free of duty, and not under Pars. 763 or 764.

## MONTHLY CASH PRICES OF TIMOTHY SEED

## NUMBER OF PLANTS TO AN ACRE

## SET AT REGULAR DISTANCES APART

Distance apart	No. Plants	Distance apart	No. Plants	Distance apart	No. Plants
3 in. by 4 in.....	522,720	3 ft. by 3 ft.....	4,840	5 ft. by 5 ft.....	1,742
4 in. by 4 in.....	392,040	3½ ft. by 3½ ft.....	3,555	5½ ft. by 5½ ft.....	1,440
6 in. by 6 in.....	174,240	4 ft. by 1 ft.....	10,890	6 ft. by 6 ft.....	1,200
1 ft. by 1 ft.....	43,560	4 ft. by 2 ft.....	3,630	6½ ft. by 6½ ft.....	1,031
1½ ft. by 1½ ft.....	19,360	4 ft. by 4 ft.....	2,722	7 ft. by 7 ft.....	888
2 ft. by 1 ft.....	21,780	4½ ft. by 4½ ft.....	2,150	8 ft. by 8 ft.....	680
2 ft. by 2 ft.....	10,890	5 ft. by 1 ft.....	8,712	9 ft. by 9 ft.....	537
2½ ft. by 2½ ft.....	6,960	5 ft. by 2 ft.....	4,356	10 ft. by 10 ft.....	435
3 ft. by 1 ft.....	14,520	5 ft. by 3 ft.....	3,904	11 ft. by 11 ft.....	360
3 ft. by 2 ft.....	7,260	5 ft. by 4 ft.....	2,178	12 ft. by 12 ft.....	302

**RULE**—Multiply the distance in feet between the rows by the distance the plants are apart in the rows, and the product will be the number of square feet for each plant or hill; which divided into the number of square feet (43,560), will give the number of plants to the acre.

## SEED VERIFICATION SERVICE BECOMING BETTER KNOWN

*(Prepared by the Bureau of Agricultural Economics)*

**T**HE U. S. Seed Verification Service became more thoroughly established during the 1931-32 season (ended July 31, 1932). The modified tag certificate, the use of which became general on January 1, 1932, has contributed in no small measure toward helping to popularize the Service. The new form of certificate makes absolutely clear what is covered in the verification and what is not. The certificate now in use reads in part as follows:

This certifies that the origin (where grown) of this lot of seed has been verified by a Federal Seed Inspector, as indicated below, and that this covers ORIGIN ONLY—NOT VARIETY, QUALITY, PURITY, or GERMINATION.

The quality of verified-origin seed probably averages better than that of non-verified-origin notwithstanding the fact that quality is not covered by the certificate. Of the samples of verified-origin seed collected, more than 77 per cent of the alfalfa and 92 per cent of the red clover samples were of good to very good quality, while less than 4 per cent of the alfalfa and none of the red clover samples were below fair in quality. The apparent superiority in quality of verified-origin seed as a whole over non-verified-origin seed may be attributed in part to the fact that low-grade seed is not eligible to carry a tag certificate.

Verified-origin seed dealers will continue to build up an ever increasing demand and will help to establish larger premiums for verified-origin seed by maintaining or raising the standard of quality. At present verified-origin seed is sold at practically the same price as or at only a slightly higher price than seed that is not verified as to origin. In other words, the verified-origin seed dealer now absorbs the larger part of the extra cost of obtaining and handling verified-origin seed.

Although the provisions governing the Service stipulate that seed from several States may be bulked or blended together and covered by a certificate, which indicates the several States of origin, so far (since 1927) over 86 per cent of the verified-origin alfalfa seed offered for sale has been certificated as of only one State of origin. About 9 per cent of the seed offered as of verified-origin has been composed of lots grown in two States, in

most of which cases the two States were adjacent or in approximately the same latitude; about 2 per cent of the verified-origin lots have been grown in three States; and about 2½ per cent have been grown in more than three States. During the past five years alfalfa seed was verified as to origin in largest quantities from States in the following order: Utah, Idaho, Montana, Kansas, South Dakota, Oklahoma, Nebraska and Colorado.

The origin of lots composed of seed from several States may be verified as effectively as are lots that have been produced in a single State. The buyer is free to draw the conclusion, if he wishes, that the larger portion of the seed in a blend or mixture was grown in that one of the States named in the certificate that is commonly considered to produce alfalfa seed which is least desirable. The relatively few verified-origin seed dealers who have been selling a number of lots of multiple origin, that is, lots made up of seed from three or more States, were requested at the beginning of this season to hold to a minimum the number of such lots, especially when those lots were composed of seed from States that are not all adjacent or that are not in a section of the country producing seed of a similar type or of the same adaptation.

Less alfalfa but more red clover seed was verified as to origin during the 1931-32 season than a year ago. The smaller quantity of alfalfa seed verified was due to the decreased quantity available for verification as a result of the decline in production, carryover of seed verified from previous crops, decreased demand for alfalfa seed last spring, relative inactivity of a few of the larger dealers in verified-origin seed, and the tendency to delay having seed verified until a prospective buyer for the seed was found. During the 1931-32 season 1,437 inspection certificates were issued, the fees for which amounted to \$8,136.07, compared with \$10,257.39 the year before, \$11,814.69 two years ago, and \$6,434.65 three years ago. Approximately 24,800,000 pounds of alfalfa and 15,200,000 pounds of red clover seed were verified as to origin during the 1931-32 season.

Sixty-five seed dealers in 21 States, or three more dealers than were enrolled at the close of last season, signed up for the 1932-33 season. The places of the three dealers who withdrew of their own accord were taken by six other dealers.

## LOCATION OF SEED LABORATORIES

Many seedsmen use state and Government seed laboratories for the testing of their various lots of seeds, both for purity and germination. The following table lists the various state and Government seed laboratories in United States and Canada.

STATE	CITY	LOCATION
ALABAMA .....	Montgomery .....	Department of Agriculture
ARIZONA .....	Tucson .....	Agricultural Experiment Station
ARKANSAS .....	Fayetteville .....	Agricultural Experiment Station
CALIFORNIA .....	Sacramento .....	State Department of Agriculture
COLORADO .....	Fort Collins .....	Agricultural Experiment Station
CONNECTICUT ....	New Haven .....	Agricultural Experiment Station
DELAWARE .....	Dover .....	State Board of Agriculture
IDAHO .....	Boise .....	State Capitol
ILLINOIS .....	Springfield .....	Department of Agriculture
INDIANA .....	Lafayette .....	Agricultural Experiment Station
IOWA .....	Des Moines .....	State Department of Agriculture
KANSAS .....	Manhattan .....	State Board of Agriculture
KENTUCKY .....	Lexington .....	Agricultural Experiment Station
LOUISIANA .....	Baton Rouge .....	State Board of Agriculture
MAINE .....	Orono .....	Agricultural Experiment Station
MARYLAND .....	College Park .....	Agricultural Experiment Station
MASSACHUSETTS ..	Amherst .....	Agricultural Experiment Station
MICHIGAN .....	Lansing .....	State Department of Agriculture
MINNESOTA .....	St. Paul .....	State Department of Agriculture
MISSISSIPPI .....	Jackson .....	State Department of Agriculture
MISSOURI .....	Columbia .....	Agricultural Experiment Station
MONTANA .....	Bozeman .....	Agricultural Experiment Station
NEBRASKA .....	Lincoln .....	Department of Agriculture
NEVADA .....	Reno .....	State Bureau of Plant Industry
NEW HAMPSHIRE ..	Durham .....	Agricultural Experiment Station
NEW JERSEY .....	New Brunswick .....	Agricultural Experiment Station

All states indicated above have laws regulating the sale of seeds. Copies of the laws may be obtained by communicating with the various departments as indicated above. Information regarding state seed laws may be obtained by writing to Seed World, 325 W. Huron St., Chicago.

## SEEDSMEN'S LEGAL QUESTIONS ANSWERED

During the past fifteen years *Seed World* has conducted a Legal Department, in which subscribers' questions have been answered and current court decisions of interest to the seed trade have been discussed. Believing that the questions that have arisen most frequently in the past are likely to continue to be encountered by the seed trade we have had our attorney, Herbert Bebb, prepare the following selection and condensation from the Legal Department material.

### Catalog Delay

*Question:* We figure that we have lost some sales due to failure of our printer to deliver our catalogs on the agreed date. Are we entitled to recover such lost profits?

**ANSWER:** In *Drumm Seed Co. vs. McFarland*, 30 S. W. 93, the Court held that before such lost profits can be allowed "the amount of loss thus sustained must be shown with reasonable accuracy and the instances in which it would be possible to make this proof must necessarily be exceptional." In view of the difficulty in proving such damages we advise the inclusion of a liquidated damages clause in important printing contracts.

### Commission Seeds

*Question:* What protection does the wholesaler have against a bulk sale of commission seed stand and packets or against their being levied upon by a judgment credit of the retail dealer who has them on consignment?

**ANSWER:** The consignee of a stand of commission seeds is legally a "Bailee". In our opinion his authority to sell the packets separately at retail does not amount to a representation by the wholesaler that he has authority to sell or pledge the entire stand. See *Romeo vs. Martucci*, 72 Con. 504.

### Corporate License

*Question:* In connection with our commission seed business should our corporation be licensed to do business in those states in which we will place our stands or boxes?

**ANSWER:** By the weight of authority sales by a consignee of goods received from a consignor out of the state are regarded as Interstate Commerce and hence a corporate consignor need not be licensed to do business in the state in which the sales are made. See *Butler Brothers vs. U. S. Rubber Company*, 156 Federal 1.

### Crop Failure

*Question:* Does a crop failure excuse us from furnishing strawberry plants which we have contracted to furnish at this season?

**ANSWER:** No. If you unconditionally undertook to furnish a certain number of plants without stating where they were coming from or otherwise connecting your liability with the supply then you would remain liable despite the crop failure.

### Damages

*Question:* What is the proper measure of damages for loss of crop because of faulty seed?

**ANSWER:** Where a crop is produced upon which expected profits can be estimated the proper measure of damages is the difference in value between the crop grown and the crop that would have been grown if the seed had been according to contract. If no crop is produced then the measure of damages includes (1) the purchase price; (2) the rental value of the land; (3) the labor in preparing, sowing, cultivating; (4) hauling the seed from the place of purchase. See *Lundquist vs. Jennison*, 214 Pac. 67.

### Disclaimer, Custom

*Question:* Where there is no non-warranty clause in the written contract, can the seedsman defend on the theory that the parties must be understood to have dealt with reference to the general non-warranty custom?

**ANSWER:** Yes. The tendency of recent decisions, particularly in the West, has been strongly in the direction of recognizing the non-warranty custom, thus in effect incorporating the disclaimer clause into seed contracts. The most recent decision along this line was *Hoover vs. Utah Nursery Company*, 7 Pac. (2nd) 270, in which earlier authorities are discussed, particularly the exhaustive opinion in *Miller vs. Germain Seed & Plant Company*, 193 Cal. 162. Other cases are cited in 37 LRANS 79; An. Cas. 1918 B71; 16 ALR. 859, which will be found in any large law library. Most of the cases giving effect to the disclaimer custom have been from west of the Mississippi River but during the past year New York was added to the list by an important decision in *Lumbrazo vs. Woodruff*, 256 N. Y. 92. Some of the refusals to give effect to the disclaimer custom may be attributed to failure of the seedsman and his attorneys to make sufficient proof as to the existence of the custom. Such a case will be found in *National Seed Company vs. Leavell*, 259 S. W. 1035. In *American Warehouse Company vs. Ray* (1912 Texas Civil Appeals), 150 S. W. 763, it was held that the disclaimer custom could have no effect unless it was to show that the plaintiff "had knowledge of such custom or contracted with it in view."

### Disclaimer, Location

*Question:* Where should the disclaimer be placed?

**ANSWER:** On your letterheads and on all forms on which contracts may be drawn, we advise placing the disclaimer in such a location that it will read as a part of the contract. Some cases hold that obscurely printed conditions above the salutation upon a letterhead will not be read into a contract written thereon. One such case is *Sturtevant Co. vs. Fireproof Co.*, 216 N. Y. 199. On the other hand, it was held in *Poel vs. Brunswick Co.*, 216 N. Y. 310, that such printed additions, if sufficiently prominent, will be taken as part of the contract. *Rodesch vs. Kirkpatrick Coal Company*, 41 Fed. (2nd) 518, is a similar case.

Placing the disclaimer on tags and invoices is not alone enough since on most sales the contract has been closed before these papers come to the buyer's attention. See *Edgar vs. Breck*, 172 Mass. 581, and *Werd vs. Valker*, 176 N. W. 129.

### Disclaimer, Relation to Pure Seed Law

*Question:* Is it permissible to put the standard disclaimer on the tag required by the uniform Pure Seed Law?

**ANSWER:** We understand that some state officials have taken the position that such use of the disclaimer is inconsistent with the spirit of the requirement that certain information be placed on the tag. In *Mangelsdorf Seed Company vs. Busby* (1926 Okla.), 247 Pac. 410, the Court held that

the seed company "had a clear right to meet this issue of implied warranty by proof tendered of an express non-warranty." Although the presence of the disclaimer on a tag was not involved, the case did arise under the Pure Seed Law and if the disclaimer can be proved when used separately, we see no legal reason why it should not appear on the tag provided it is so used as not to obscure the statutory data.

### Disclaimer, on Retail Sales

*Question: If a retailer sells over the counter seeds in packages bearing a wholesaler's disclaimer is the retailer protected by such disclaimer?*

**ANSWER:** No, the retailer in such case would not be protected by the express disclaimer although he might defend on proof of a general custom not to warrant. See *Jolly vs. Blackwell*, 211 Pac. 748.

Authorities as to the liability of the producer to the ultimate consumer who purchased from a middleman are cited and discussed in 39 A. L. R. 1000 and in 17 A. L. R. 672. The editor points out that an early case permitting the sub-purchaser to enforce warranties against the producer has been repudiated and that unless the facts involve a tort liability the sub-purchaser must look only to the retailer with whom he dealt.

### Disclaimer, Standard Wording

*Question: What is the official wording of the Seed Trade Disclaimer Clause?*

**ANSWER:** "The ..... Company gives no warranty, express or implied, as to description, quality, productiveness, or any other matter of any seeds, bulbs, or plants it sells, and will not be responsible for the crop."

### Disclaimer, Variations in Wording

*Question: We feel that the wording of the standard disclaimer is abrupt and harsh. We contemplate substituting a statement emphasizing the care that we take but pointing out that we have no control over conditions of cultivation. Would you approve of such changes?*

**ANSWER:** While we sympathize with your reluctance to employ wording which emphasizes only the negative aspects of your engagement, we nevertheless advise sticking to the standard wording. There is danger that you might fail to cover the entire ground or that your new wording might involve ambiguities that would not occur to you. More important than this is the point that the use of uniform wording by the entire trade is an advantage, first, to the trade since each seedsman using the clause is strengthening the custom theory on which many cases are being favorably decided and, second, to the individual since it is to the interest of each seedsman to bring himself squarely within the protection of this uniform custom.

### General Statement of Law

*Question: Where may I read a general introductory statement of law applicable to warranties of seeds?*

**ANSWER:** You will find such a statement in the introduction to the annotation to *Johnson vs. Foley Company*, in 16 A. L. R. 859. We may summarize a part of that statement as follows. Most seed contracts are sufficiently descriptive to indicate that the subject of sale is to be used for planting. This gives rise to an obligation which some courts call an "express warranty," other an "implied warranty," and still others a "condition." Since this obligation of the

seller survives acceptance at least as to defects which inspection would not disclose, the distinction is often disregarded. The fact that the buyer cannot determine by inspection whether the articles tendered by the seller comply with the contract is the reason for the exceptional rule applied to sale of seeds that in absence of an express disclaimer a warranty will be implied.

### Growers Contract

*Question: Can you give us a good form for a contract between a seedsman and a grower?*

**ANSWER:** The form used by the Ferry-Morse Seed Company has stood the test of successful litigation in *Ferry vs. Forquer*, 202 Pac. 193, and *Ferry vs. Smith*, 209 Pac. 1066. That form is as follows:

..... Seed Co. .... P.O. .... State  
..... 19..

I.....agree, on the terms and conditions stated below, to raise for you, on lands of suitable quality and condition, located in Section.....Township of.....County of.....and State of.....and to deliver to you at.....the following seeds: .....

I agree properly to prepare and plant such lands with Stock Seed to be furnished by you at .....; properly to cultivate and care for the crop; to harvest, cure, separate and clean, as well as possible with ordinary farm machinery, its entire seed product, in such manner as to secure the greatest possible return of seeds suitable for Seedsman's use; and to sack and deliver all the seed to you at....., as soon as the seed can be put in suitable condition, and before November 30, 19...., without wasting, feeding, selling, reserving or allowing any portion of the crop or seed furnished to pass from my possession except as delivered to you. You are to pay all freight charges on stock seed, crop and on any bags you send me. The stock seed and seed crop produced from it is, and shall remain your property except as otherwise stated in this contract.

In order to prevent hybridization and to keep the crop pure, I agree that during the life of this contract I will not grow Seeds of the same species for any other person, and as far as I am able to prevent it, there shall be no other plants of the same species grown within ten rods of this crop. I will take at all times every reasonable precaution to keep the crop pure and to prevent seed of any chance plants of a different variety or of a stock of the same variety different from that sent me by you, becoming mixed with seeds grown under this agreement. You or your agents may at any time enter the field and, at your own expense, make such examination, selections or rejections as you or they deem desirable for the betterment of the crop for seed purposes, and you or they shall not be liable for necessary damage, if any, to my crop resulting from such work.

You are carefully to weigh and test the crop upon its delivery. Any remilling is to be done by you at your expense. You may refuse to accept the crop if less than eighty-five per cent (85 per cent) of the seeds are vital, or if in your judgment the crop is in any other respect unfit for Seedsman's use and cannot be made fit without an unreasonable amount of cleaning or hand picking. In case of dispute as to vitality, it is agreed that a sample of the seeds may be submitted to the United States Department of Agriculture for testing, and the report of the Department of Agriculture on the sample submitted shall be final and binding on both of us. The sample shall be taken from the seeds as they stand in your warehouse, by drawing a sample from each sack, then thoroughly mixing the same, and taking a sample from the mixture, which shall be sent by the ordinary course of mail or otherwise to the Department of Agriculture at Washington, D. C. In case you refuse to accept the crop, its title shall vest in me and in such event or in case of loss of stock seed through crop failure or otherwise I agree to reimburse you immediately for stock seed and bags furnished, and for all freight charges paid by you on any rejected crop. If, within 60 days after you mail me notice of refusal to accept the seeds, you do not receive directions from me as to their disposition, you may dispose of them as you wish.

In consideration of the faithful carrying out of this Agreement by me and as full compensation

for my services, you are to pay me at the rate of .....per necessary weight to give 100 pounds of hand-picked ..... for all seed in excess of the Stock Seed furnished me, delivered under this contract and accepted by you; payment to be made immediately upon your acceptance of the seed. No payment is to be made for any seed which you do not consider sufficiently pure, clean and dry for Seedsman's use and no credit is to be given for dirt, or for damaged or poor seed which has to be removed. In all cases, the screenings and culls are to remain the property of the party who separates them from the crop.

If so requested in writing, you shall loan for my use free of charge, suitable bags for shipping the crop, or you shall allow me full wholesale market value for all new, sound, undefaced, seamless cotton grain bags which I may buy and you receive containing the crop.

This letter, when accepted by you, shall constitute our contract, and be construed according to.....laws. There are no agreements or understandings regarding the subject matter of this letter other than expressed above.

Yours truly,

Accepted at.....this ..... day of.....19....

.....Seed Co.  
By.....

In Thiel vs. Pac. Fruit & Produce Co., 4 Pac. (2nd) 356, a seedsman was defeated because he had failed to incorporate in his contract a reservation of title such as is included in the Ferry form. See also Robinson vs. Stricklin, 73 Nebr. 242.

### Notice of Defects

*Question: Can a buyer of warranted seed, in the face of knowledge that the seed is faulty, plant it and recover crop damage?*

ANSWER: No. In Tomita vs. Johnson (Idaho), 290 Pac. 395, it was shown that an experienced potato grower knew from cutting into the seed potatoes that they were diseased, and the Court held "under these facts he cannot recover crop damage resulting from planting the diseased seed in question."

### Plant Patents

*Question: What are the statutory limitations upon plant patents?*

ANSWER: The Patent Law in Sec. 4886 provides that "any person who has invented or discovered any new and useful art, machine \* \* \* or who has invented or discovered and asexually reproduced any distinct and new variety of plant, other than a tuber-propagated plant, not known or used by others may, upon payment of the fees required by law \* \* \* obtain a patent." The limitation to asexual reproduction means that the plants of most importance economically are excluded. For example, our common cereals being reproduced by seed and not by cuttings cannot be patented. The "tuber-propagated" wording is for the purpose of excluding potatoes. It should be noted that the wording of the statute requires that mechanical patents be "useful" but that this word does not appear in the phraseology relating to plant patents.

### Trade Mark; Variety Name

*Question: We have originated a new variety of sweet corn. Can we prevent competition by trade marking the name?*

ANSWER: No. The name which you give to your new variety will become in substance a descriptive name and can be used as such by any person to describe seed from the same strain. The proper function of a trade mark is simply to identify the producer or origin of goods. In general a descriptive name is not available for registration as a trade mark. See Hoyte vs. Lovett, 71 Federal 173, 178.

# AMERICAN BULB COMPANY

CHICAGO-NEW YORK

*Growers and Distributors*

**'Lone Star'**

(Texas Grown)

**NARCISSUS  
PAPER WHITES**

There is a valuable market for all seed merchants in the sale of these easily grown "home bulbs." "Lone Star" brand is thoroughly dependable—every bulb is guaranteed to give perfect blooms. We have sold over 15,000,000 of these bulbs to the entire satisfaction of all purchasers. These bulbs have been tested and proven by every State Horticultural College in the country. Write us for details for coming season.

We can advantageously supply the seed trade with a complete assortment of all foreign and domestic bulbs for Spring and Fall delivery.

## TRADE MARKS AND SLOGANS

MANY SEEDSMEN as well as manufacturers have spent years in building up a demand for their trade-marked items and buyers have for years bought on these brands. At times a buyer does not remember the name of the manufacturer or seedsman who produces a certain brand. This alphabetical list of trade-marked brands should prove useful.

### SEEDS

- Acme**—seeds—J. Chas. McCullough Seed Co., Cincinnati, Ohio.

**TRADE MARK SECTION**  
 Starting Page 40—For Leading Trade Marks  
 and Brands Used by the Seedsmen and  
 Manufacturers of Allied Lines

## DIRECTORY SECTION

On the following pages are given the names and addresses of seed growers and wholesalers of both field and garden seeds. For manufacturers of store and warehouse supplies and merchandise for resale purposes, etc., see pages 102 and 146.

By this method of classification it is easy to locate the growers or wholesalers in any particular state or section of the country and the manufacturer or distributor of anything used by the seed dealer in the conduct of his own business or sold to his patrons.

Every effort has been made, in compiling this directory, to make it as complete as possible. The names and the lines handled were supplied by the firms listed in response to a general invitation to the trade.

The publication of this book has been made possible by the support and co-operation of the firms listed in bold face type and whose advertising appears on the pages as indicated by the numbers following their names.

In cases where firms specialize in the handling of a certain item this fact is indicated by the commodity appearing in parenthesis after the company's name.

Helpful Hints to Vegetable Gardeners

DECIDE early how much ground you will use and what you will plant.

Plow or spade before the ground freezes, if you can. A little fertilizer or manure will insure better crops.

Don't cover the seed too deep. It will germinate more quickly if only a little soil is on the seed. See full cultural directions on the packets.

Leave the garden alone until the plants come up. If you have sown bulk seeds, thin rows after plants are up an inch or two. Using seed-tape reduces thinning to a minimum.

Lima beans should be planted with the eye down and covered one inch deep.

Sow radishes directly in the row with your parsley.

Order your seeds early so that you can take advantage of the first signs of spring.

When you water, do it thoroughly—don't sprinkle, soak.

Plant early everything but beans, wrinkled peas, and vine crops.

If soil is dry, water may be put on. Let it run slowly and don't spare the water—it's cheap.

Don't think water will take the place of thorough cultivation—it won't.

You will have a better garden if you use the hoes more, and the hose less.

Weeds are garden robbers. Kill them when they are small.

For large head lettuce, thin out to at least six inches.

Plant enough to have some vegetables for home canning.

Buy only first-class, reputable materials, even if it means less of them.

Get a good spray and use it.

Hoe often to loosen the soil and hold moisture around the roots of the plants.

You cannot do good work with poor tools.

Have a good hoe, rake, fork and spade.

A small hand cultivator will make you feel like a professional gardener. It will soon pay for itself, too.

Don't try "watchful waiting" for bugs, worms and other vermin. Swat 'em or they will spoil your plants.

Plant small, quick growers like lettuce, radishes, etc., between the rows of larger, slower maturing sorts. In the case of early sorts such as spinach, start tomatoes, corn, etc., between the rows to occupy the ground after the former is harvested.

Never cultivate or handle any kind of beans when the vines are wet. This is the easiest way to spread a serious disease and ruin the crop.

Success against weeds means keeping them out, not taking them out after they get in.

To ensure a succession of such plants as peas, beans, lettuce, radishes, beets, kohlrabi, etc., sow a fresh row every week or so.

## CHARACTERISTICS OF VEGETABLE SEEDS

The figures in the following table are intended to be approximate only, as variations occur in varieties and are also due to conditions of growth, harvest and storage.

Vegetable	Average Germination 1 Year Old Seed	Average Duration of Germinating Power in Years	Average Number of Seeds per Ounce	Average Weight of Quart of Seed in Ounces	Amount Required for 100 Feet of Drill	Amount of Seed required Per Acre	Depth of Planting
Asparagus.....	90%	3	1,000	32	1 oz.	5 lbs.	1 in.
Beans, Dwarf.....	90%	3	100	30	1 lb.	60 lbs.	1 in.
Beans, Pole.....	90%	3	100	30	½ lb.	30 lbs.	1 in.
Beet, Garden.....	80%	4	1,750	10	1 oz.	6 lbs.	1 in.

**Aster Aurora:** A new and outstanding class of Aster which has met with great success everywhere. It comes in two varieties: Azure Blue with yellow center and Golden Queen (all yellow).

**Zinnia Scabious flowered:** The most important novelty of recent years. A new variety of Zinnia, the center of which resembles the Scabious. It is of most beautiful effect in bouquets and promises to become as popular as the Dahlia flowered Zinnia.

## POPULAR GARDEN ACCESSORIES

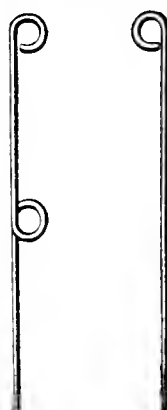

### INTERCHANGEABLE PLANT SUPPORTS

Made of steel wire, electric welded. Built in halves. Hooked together to form rigid plant support. Halves can be used separately for foliage in house borders. Is easily shaped by hand to support any particular bush or flower.

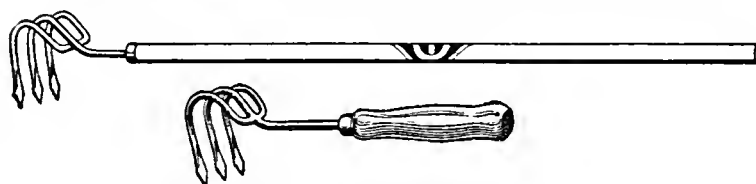

### ONE AND TWO-EYED STAKES

Always a good demand for these simple, efficient stakes. Wired in bundles of 50 pieces. Should straight stakes be desired, ask for prices. We can furnish any length or size wire.

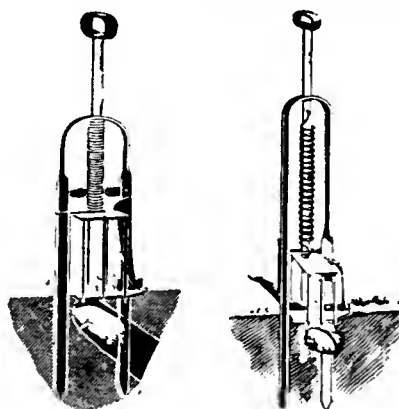

### EXTRA HEAVY ALL STEEL WEEDERS

With short and long handle, this weeder is made of heavy steel wire, electric welded, double tinned throughout and rust proof, with natural finish 6½ in. and 36 in. wood handle.

We assure you there are none better.

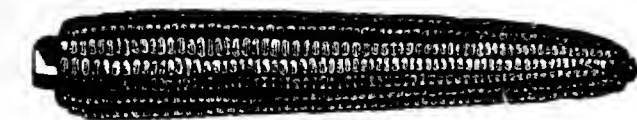

### REDDICK AND LITTLE GIANT MOLE TRAPS

No mole can pass under these traps and live. Kill the mole, because they have destroyed annually millions of dollars worth of crops. These

two traps are the best means of accomplishing this, and if properly displayed in your catalog will bring the demand because they are well known as an easily operated, dependable Mole Trap. Write for details.

**LADY  
RUFFLES**

*Awarded Gold Medal  
Scottish National Sweet Pea Society*

## LADY RUFFLES

### Summer Flowering

*Winner of the Gold Medal, Scottish National  
Sweet Pea Society*

A beautiful soft pink on a white ground. The warm glow of color runs well down to the base of the standard and wings. Extremely strong growing, with four large, ruffled flowers on stout stems. Last well when cut. A lovely addition to our ruffled class. *Packet of 20 seeds to retail for 25c. \$12.50 for 100 packets; \$100.00 for 1,000 packets.*

### Burpee's Sweet Pea **AMBITION**

*Award of Merit and Gold Medal, National  
Sweet Pea Society of Great Britain*

A NEW lavender, perfectly distinct, with a darker shade on the base of the standard and wings when young. Has all the points of a first class pea. A great improvement over Powerscourt. *Packet of 30 seeds to retail for 25c. \$10.00 for 100 packets; \$90.00 for 1,000 packets.*

### Burpee's Sweet Pea **FLORADALE**

*Award of Merit, National Sweet Pea Society  
of Great Britain*

A NEW salmon-pink on a cream ground. Long strong stems each bearing four very large frilled blooms, many exquisitely duplexed. *Packet of 30 seeds to retail for 25c. \$10.00 for 100 packets; \$90.00 for 1,000 packets.*

*ELECTROS Supplied Free. Write for Wholesale List of Burpee's Seeds*

**Brown Top (Colonial Bent) (Gov't. Certified)**

**Ryegrass**

**Chewings Fescue**

**Rescue Grass**

**Crested Dogtail**

**Clovers**

**Garden and Field Peas, etc.**

**Horse Beans**

## SAVE TIME AND MONEY

by using these seed germination pads. They can conveniently be used in any make of machine. The size of the pads are 3x3 inches, each having 100 indentations.

### Why Count the Seeds?

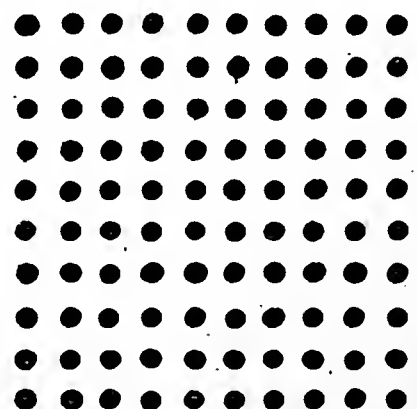

The indentations of these pads are correct for average size seeds such as Red Clover and all seeds of similar size. If it is desirable to have a blotter pad on top, they can be used to advantage in that way. Orders for thousands of these pads have already been received.

## SEEDBURO QUALITY

The cost is reasonable. Samples and prices on request.

**The Seed Trade Reporting Bureau**

325 W. Huron Street, Chicago.

# **NOW! Mr. Seed Store Owner—**

You can handle NURSERY STOCK safely and profitably—without any of the heretofore dangers from drying out, root-breakage or over-stocking.

This new method of preparing Nursery Stock has been especially developed for the Store and Counter Trade and solves all of the harassing problems which, in the past, have annoyed the store which stocked this ever-profitable line.

Write at once for complete and detailed information covering this "NEW DEAL" in Nursery Stock.

⌘

IT PAYS TO SPRAY

⌘

DAMAGE DONE by insects and fungus diseases amounts to many millions of dollars annually. In order to combat them, manufacturers of insecticides and fungicides have scientifically prepared many sprays and dusts which have been found effective in the control and eradication of these pests and diseases.

These products are sold by the manufacturers under various trade names. Retail seedsmen have found it most profitable to have them for sale. Each year the demand for insecticides and fungicides is increasing.

In order to make it easier for the users of this GUIDE to ascertain what insecticide or fungicide to use for the numerous pests that infest growing crops, the following table has been arranged giving the names of some of the products which have been found effective. Directions on how to use these products are not given in the table, due to the fact that the manufacturers show these directions on the containers.

Following is a list of the manufacturers of the products named in this table:

California Spray Chemical Co., Berkeley, Calif. "Garden Volck" "Nursery Volck"	The Kalo Co., Quincy, Ill. "Kalo Spray" "Kaloil" "Kalite"	Rose Manufacturing Co., Philadelphia, Pa. "Aphistrogen" "Insectrogen" "Mexogen"
Chipman Chemical Company, Bound Brook, N. J. "Cubor" "Cubor Dust" "Calgreen"	McCormick & Co., Inc., Baltimore, Md. "Red Arrow"	Shepard Laboratories, Council Bluffs, Ia. "Sheps"
William Cooper & Nephews, Chicago, Ill. "Derrisol"	McLaughlin Gormley King & Co., Minneapolis, Minn. "Ever Green" "Selocide"	Tobacco By-Products & Chemical Corporation, Louisville, Ky. "Black Leaf 40" "Nicofume Liquid"
Grasselli Chemical Co., Cleveland, Ohio "Dutox" "Sulforon"	Mechling Bros. Chemical Co., Camden, N. J. "Pyrote"	Andrew Wilson, Inc., Springfield, N. J. "Awine" "Rotofume" "Tri-Tox-Cide" "Fung-O"
"Kleenup Oil" "Manganar Rose Dust"	Nicotine Manufacturing Co., St. Louis, Mo. "Nicotinum" "Red Ring" Nikoteen "Nikoteen"	
Hammond Paint & Chemical Co. Beacon, N. Y. "Slug Shot" "Thrip Juice" "Nicotine Soap" "Rose Dust"

## Two Big Profit Makers

**SHEPS PLANT SPRAY** leads among all non-poisonous plant insecticides. Absolutely effective-economical ( $\frac{1}{2}$  oz. makes 1 gal. spray solution), repeats readily, put up in sizes selling from 10c and up.

**SHEPS CONCENTRATED CATTLE SPRAY** enables the farmer to mix a better barnyard fly spray at a great saving in cost. And it's a real profit item for the dealer.

*Write for Prices and Discounts. Do it today. We will also send you free sample. Let SHEP help you make more money during 1933.*

## Self-Watering Germinator

For Field, Vegetable, Flower and Tree Seeds

Daylight Efficient for Long Tests Easily Sterilized

Now after much experimenting a reliable and efficient self-moistening germinator is available. The self-moistening porous disc has divided surface to facilitate counting. There are 10 sections of 10 indentations. The cover is of clear glass and ventilated.

This daylight germinator will attract attention in store, office or display window. More than 100 of these germinators are used by one of the large seed houses. It is guaranteed to be satisfactory. Price \$3.50 each, or \$3.25 in dozen lots, delivered in the United States.

**The Pulverized Manure Co.,** 39 UNION STOCK YARDS  
CHICAGO, ILLINOIS

**WIZARD SHEEP AND COW MANURES**

## Manganese Starvation

PREVENTED WHEN YOU USE  
**CARUS Manganese Sulfate**

Helps blossoming, increases yields, aids plants to mature earlier, bearing fruit of better quality and flavor which keep and ship better. It also assists to prevent Yellows (Chlorosis) of spinach, in fall especially, tomatoes, peas, beans, etc. Beneficial to all plants growing in sweet soils under glass or in the open field.

Supplies 5 additional plant food elements supplementary to commercial fertilizers balancing the plant's mineral diet. When used in conjunction with commercial fertilizers, growers find it to give better results than manure fertilization.

The new handbook, "Manganese Sulfate, Its Use and Application in Agriculture" sent on request free. Write for your copy today.

## LEADING PLANT FOODS

### Sheep's Head Pulverized Sheep Manure

A concentrated organic plant food, sterilized of weed seeds, for use where quick, active results are desired. Packed 5 lbs., 10, 25, 50, 100 pounds to the bag.

### Sheep's Head Sterilized Cattle Manure

For plants requiring a loose, cool soil reclaimant; especially desirable for flowers, such as roses, dahlias, tulips, house plants. Sterilized of weed seeds. Organic. Odorless. Packed 100 pounds to the bag.

These two products are all the plant foods you need to build yourself a thriving seed business—in store or catalog. Send us your requirements and we will furnish copy, layout and cuts for catalog or newspaper use. Ask for our dealer proposition.

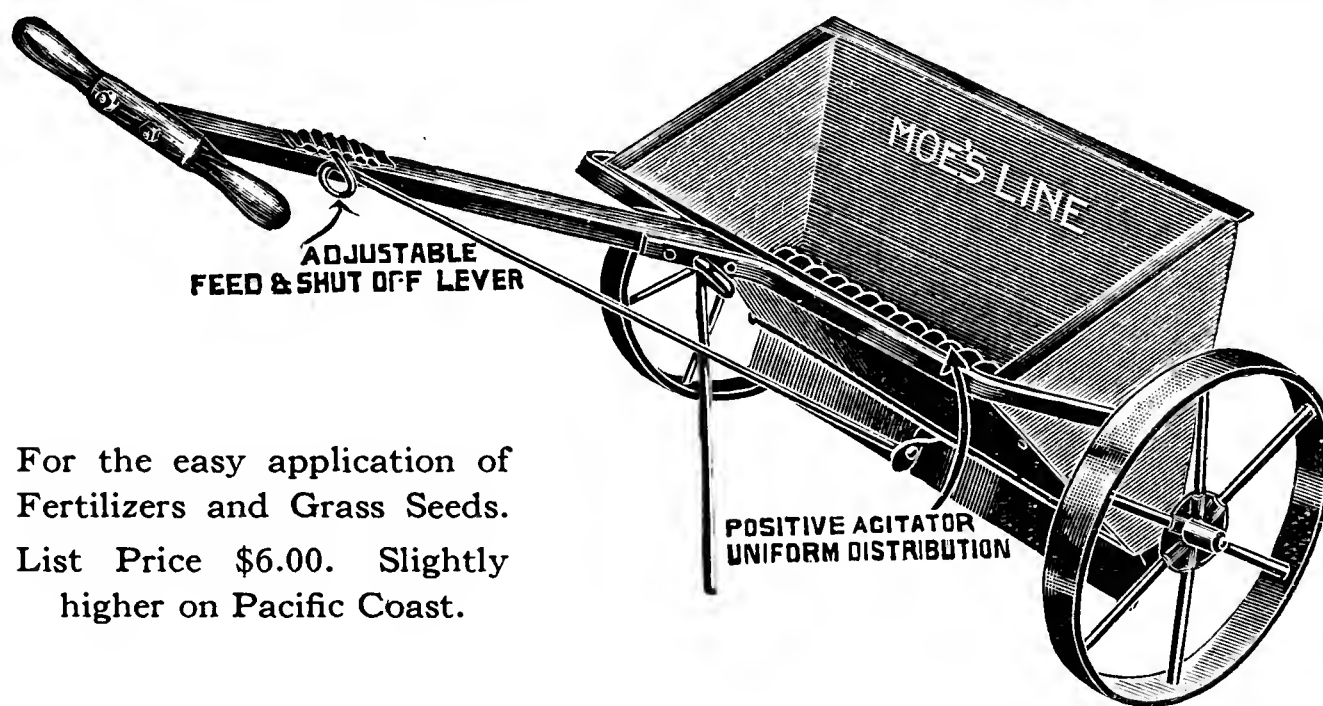

## THE NATURAL GUANO COMPANY

816 River Street

Established 1903

Aurora, Illinois

## Moe's Fertilizer Spreader and Seeder

For the easy application of  
Fertilizers and Grass Seeds.

List Price \$6.00. Slightly  
higher on Pacific Coast.

No. 500—Spreader and Seeder for lawns and gardens. Easy acting spiral agitator. Quick adjustment of the feed, any desired opening, or complete shut-off. Runs very easily, no hard pushing or tugging, no clogging, and spreads uniformly. May be pushed or pulled as preferred. Can also be used for spreading salt, sand or ashes on icy walks. Hardwood handle, and steel wheels, attractively painted.

Write for Catalog and Prices.

# PROFITABLE ITEMS FOR SEEDMEN

## LAWN EDGE TRIMMER No. 136

A practical tool, needed by every home owner. Plows a clean "U" shaped trench, delivering the cutting on the walk automatically as trimmer is pushed along. No other tool like it.

## WEED PULLER No. 96

A scientifically constructed weed puller with an easy grip handle. Operates easily and efficiently without destroying the lawn. Made of the finest grade materials.

## COMBINATION CULTIVATOR HOE No. 125

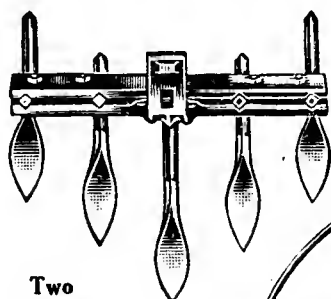

A "Six-in-One" tool—used for hoeing, cultivating, dandelion cutting, dandelion rake, drill digger for sowing seeds, weeding and many other uses.

**IMPERIAL BIT & SNAP CO.**

RACINE,

WISCONSIN

## The New Norcross

Two Sizes  
8" and  
10"

## New Norcross GARDEN GROWER

*Mulcher — Weeder  
Cultivator — Plow*

Built of finest materials, this sturdy handsome machine has many superior features of value—especially the 5-prong (Norcross) Cultivator and large Shovel attachments—exclusively "Norcross".

We also specialize on Hand Cultivators and Weeders for both garden and lawn. Write for circulars and *New Low prices* for 1933.

**C.S. NORCROSS & SONS, Mfr's.**  
Bushnell, Ill. U. S. A.

*Seedmen, Dealers, Distributors*

# NEW SALES OPPORTUNITY

**SUPERIOR LAWN EDGER**, a new, fast-selling, money-making item. A lawn edger not in name only, but ACTUALLY DOES easily and efficiently solve that vexing problem.

**Just Introduced! Phenomenal Reception. A High Grade Tool**

**RETAIL PRICE \$2.00**

Everyone delighted! No wonder. It's expertly made of very best materials. Cutting section is high-carbon steel. (Sharpened to keen knife-like edge.) Steel ball mounted roller. Best quality Northern Ash handle.

Wholesalers and Retailers pleased with our proposition. You will be, too.

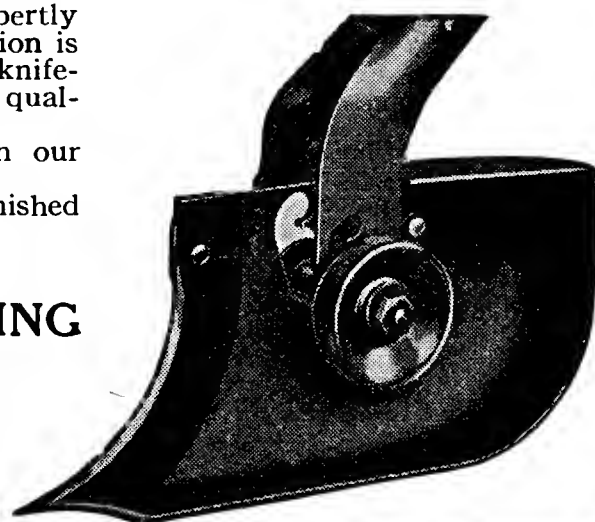

Leaflets For Envelope Stuffers — Furnished upon Request.

# DEALERS!

Pick up quick PROFITS  
with

Here is something right down your alley — a natural profit-maker for you. Everyone doing business with you is an actual prospect for Lite-O-Glas. It is flexible — shatter-proof — and gives more warmth and better protection than glass — yet costs about one-tenth as much.

## Cash in on Nation-Wide Sweep to Lite-O-Glas

No poultry, flower or vegetable raiser can afford to be without Lite-O-Glas for new building or replacements. Tacked on in a jiffy—it lets in laying-stimulating, health-promoting violet rays—yet keeps cold out better than glass. No wonder sales are spreading like wild-fire.

Remember, Lite-O-Glas stands alone in quality; finest treatment, strongest cloth base—and finished with the most perfect impregnating process ever developed.

You can sell it like hot cakes—by the roll, or a few yards at a time—on the famous Fleming "Satisfaction or Money Back Guarantee."

# LEGUME INOCULATION

**G**ROWERS of legume crops find that seed inoculation pays. It pays for the following reasons: (1) It enables plants to secure nitrogen from the air and passes it on to the plants for their use. (2) It prevents crop failures. Very often a legume crop is a complete failure if the seed has not been inoculated. (3) It increases crop yields; in some cases several hundred per cent. (4) It improves the crop quality. (5) It enriches the soil.

## Reliable Dealers

There are many reliable manufacturers of legume inoculation material. It is not necessary any longer to use cultures from state agricultural experiment stations, for these commercial concerns have reliable and tested cultures. These firms employ bacteriologists who have made this line of work a life-long study. Each culture for the different kinds of legumes is carefully prepared and when properly mixed with the seeds to be planted the desired inoculation results.

These commercial cultures are inspected and tested from time to time by state and government officials, which tends to keep manufacturers careful as to the potency of their product. As a result of the painstaking manner in which these legume

cultures are manufactured, some excellent cultures are now available.

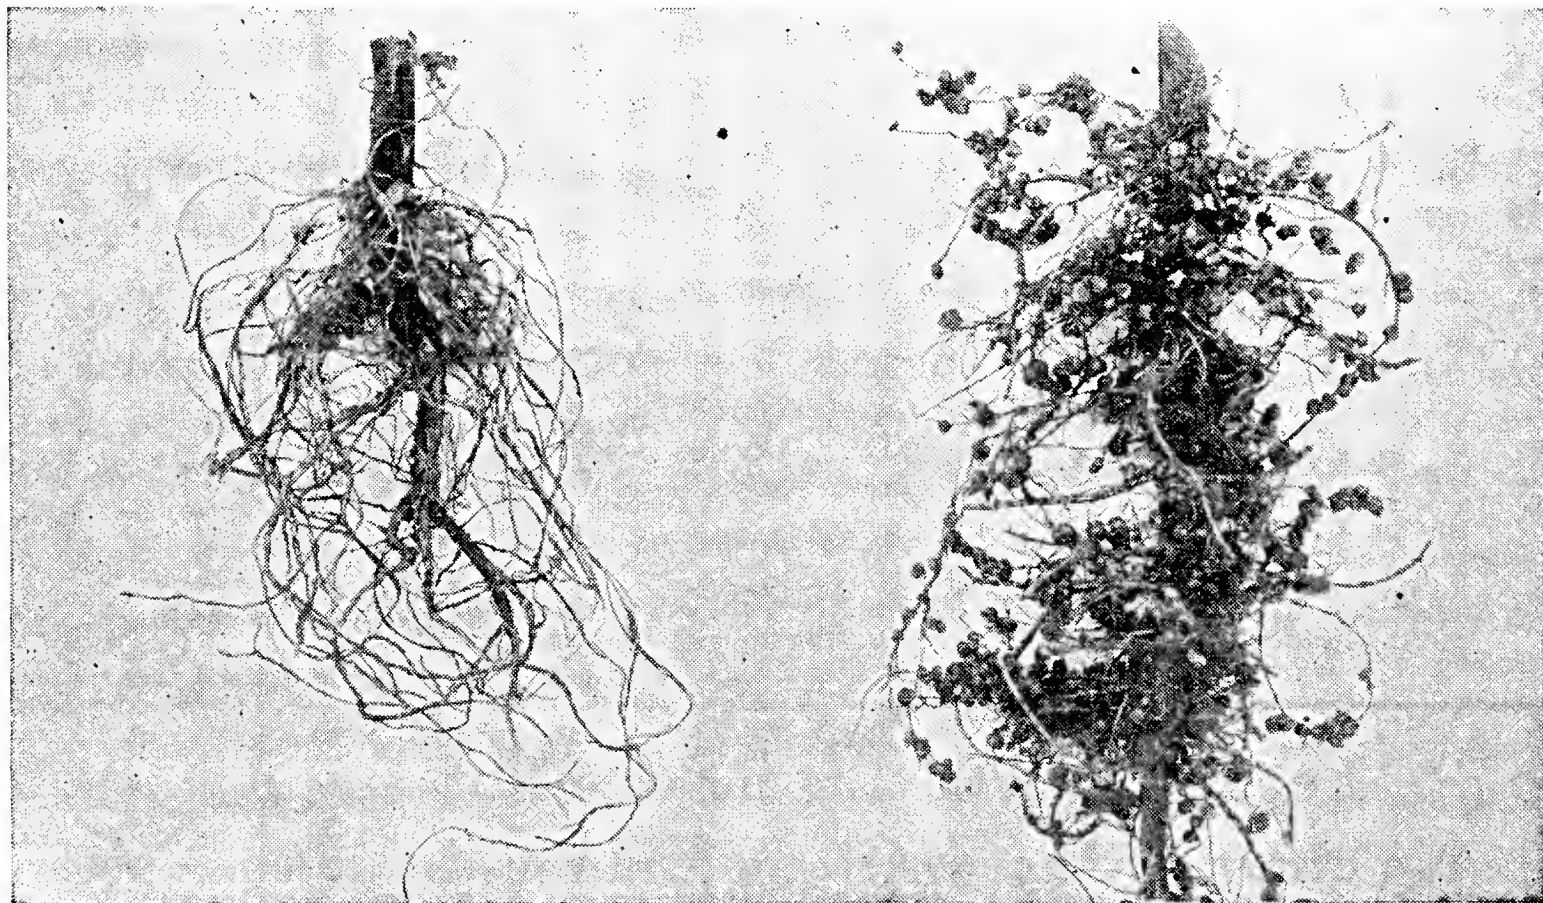

## Increased Demand

The demand for inoculants is increasing each year. Farmers are slowly but surely finding out that inoculating seed pays. This demand is bound to increase as time goes on and there is little question but that the demand will be doubled in a very short time.

Due to this increased interest in inoculation seed dealers are finding that it pays to sell well known brands of inoculants.

The margin of profit obtained from the retailing of legume inoculants is very attractive. Seedsmen should put special stress on their sales efforts to urge all buyers of legume seed to purchase a supply of inoculants sufficient to treat the seed they buy.

The manufacturers of legume inoculants put up their products in attractive containers thus making them practical for display purposes. They also cooperate with seed dealers in supplying them with window display material, electros, and advertising copy for seed catalogs and local newspaper advertising. In fact,

**Left—Roots of Plant Not Inoculated. Right—Roots of Plant Inoculated Showing Nodules.**

## Attention Dealers

Protect yourself and your customers by selling an Inoculator that:

- (1) is ABSOLUTELY GUARANTEED to give SATISFACTORY PERFORMANCE.
- (2) Every Farmer can AFFORD to use.
- (3) Is NATIONALLY ADVERTISED.
- (4) Is CONVENIENT to USE.
- (5) Allows you LARGE PROFITS.
- (6) Is DATED for your protection.
- (7) Does NOT MOLD or SPOIL.
- (8) Does not require costly and troublesome yearly returns.

Compare McQUEEN'S with any other Inoculant as to QUALITY—PRICE—or CONVENIENCE and see why our Dealer's are Increasing their INOCULATION SALES and PROFITS.

LONG ISLAND CITY, N. Y.

these manufacturers make every effort possible to aid seedsmen in promoting the sale of legume inoculants.

### Seeds That Need Inoculating

The following seeds require inoculation in order to assure a perfect stand: Red clover, alfalfa, sweet clover, alsike clover, white clover, crimson clover, bur clover, yellow trefoil, lespedeza, garden peas, field peas, lentil, vetches, sweet peas, cowpeas, soybeans, garden beans, field beans, lima beans, velvet beans, peanuts, beggarweed, lupines, sainfoin and other legumes.

### Inoculation "Don'ts"

In order that seed dealers might be in possession of accurate information we are publishing some "don'ts" listed in Idaho Agricultural Experiment Station bulletin, which was distributed to the farmers in that state. They are as follows:—

Don't fail to send in your order at least ten days before you expect to plant.

Don't expect absolutely perfect results; your soil conditions may be at fault.

Don't expose inoculation material or inoculated seeds to direct sunlight.

Don't inoculate and apply nitrogenous fertilizers at the same time.

Don't inoculate the same legume for the same field three years in succession. If you don't secure good nodule response by the second year, have your soil tested.

Don't be discouraged if nodules do not appear as soon as you expected.

Don't pull up the plant and expect to find nodules on the few large roots. They are on the root hairs and would be left in the soil.

Don't expect nodules to form in very dry, or very moist soil. A moisture content sufficient to support best plant growth will cause best nodule formation.

Don't treat seed with a disinfectant and then with inoculation. The disinfectant may kill the bacteria.

Don't expect inoculation to overcome results due to bad seed, improper preparation and cultivation of soil, and decidedly adverse conditions of weather or climate.

Don't expect the inoculating material to control insect and disease attacks further than to increase the resistance of the plant against such attacks.

*Fresh Each Year*  
*Note the High Germ Count*

**BASED ON SUPERIOR QUALITY,  
NITRAGIN IS THE LOWEST PRICED  
INOCULATOR ON THE MARKET**

**9c** . . per Billion Legume Germs as packed  
in 1 bu. sizes for Alfalfa and Clovers  
—8c per Billion for Soy Beans, Cow Peas,  
Lespedeza—and only 6c per Billion for Peas,  
Beans and Vetch . . . even lower rates on  
larger sizes.

**FOR PRICE AND QUALITY—REMEMBER THAT NITRAGIN CAN DO ANY-  
THING CLAIMED BY OTHERS—BUT DO IT BETTER AND CHEAPER.**

Altho not recommended for best results, ANY 1 bu. size NITRAGIN can be used for 2 bu. seed, and give better inoculation than ANY 1 bu. size cheap culture.

Billions of fresh, efficient legume germs packed into every can of NITRAGIN. For your protection, NITRAGIN was the FIRST inoculator printing the Legume Germ Count as packed on every package.

### KNOW WHAT YOU ARE BUYING

Always look on the label for the *Germ Count*, *Expiration Date*, and the *Price*.

*Write for Prices and Discounts*

**THE NITRAGIN COMPANY, Inc.**  
**MILWAUKEE, WISCONSIN**

## To Sell More Inoculator

say to your customers:

**"SPILL IT over dry seed**

**... MIX**

**IT STICKS ... and hangs on**

**IT IS EASY TO USE . . . . ."**

Alone, this fact makes sales come easier.

### BUILDS PROFITS FOR YOU

Has all other things demanded in legume inoculator: PURITY . . . SUPERIOR GERM CONCENTRATION . . . REASONABLE PERMANENCE (with an expiration date) . . . LIGHT WEIGHT . . . LOW COST . . . CAREFUL PRODUCTION METHOD.

It is a clean, moist powder—30% moisture—free of charcoal or soil.

More farmers will use legume inoculant when it's Easy than when it's troublesome.

## Agricultural Insecticides, Fungicides, Weed Killer and Fertilizers

are certified as to quality and uniformity. On a consistently high record of sales performance they have earned a catalog listing with a large majority of leading seedsmen.

*Offer the Best in Your Catalog*

### WHY BUGS LEAVE HOME

TRADE MARK REG.

### Wilson's O. K. Plant Spray

A powerful yet safe and efficient contact insecticide for general outside or greenhouse use. Recommended for flowering plants and ornamentals.  $\frac{1}{2}$  pint 40c; quart \$1; gallon \$3; 5 gallons \$12.

### Wilson's Weed Killer

A clean, odorless, highly concentrated liquid offering a sure and inexpensive method of killing any undesirable plant growth. One gallon makes 40 to 50 gallons treating solution. Quart 75c; gallon \$2; 5 gallons \$8.

### Wilson's Scale-O

Highly refined miscible oil for dormant use. Controls most scales attacking evergreens as well as on fruit and shade trees. Perfect emulsion — cannot freeze. Quart 75c; gallon \$2; 5 gallons \$9.

"Pyrethrum at its Best"

### Wilson's Awinc Spray

A non-poisonous, highly concentrated Pyrethrum Spray. Easily controls both sucking and chewing insects of the more resistant type, such as Japanese Beetle, Mexican Bean Beetle, Mealy Bug, Red Spider, Rose Chafer and Slug, Aster and Dahlia Beetle, and many others. Complete, requiring only a dilution with water. Quart \$3; gallon \$10.

## "SLUG SHOT"

The Safe and Easy-To-Use Dust—Nothing  
Else to Buy.

Used more than 50 years by farmers, florists  
and home gardeners for the control of Chew-  
ing Insects, AND AS A FUNGICIDE. A  
SURE SELLING ITEM.

## "GRAPE and ROSE DUST"

The Most Easily Used Fungicide.

Prevents and controls Powdery Mildew and  
Black Spot on Roses. The safe and effective  
Fungicide, for use on all flowering and vege-  
table plants.

## "COPPER SOLUTION"

Concentrated liquid fungicide, the most  
effective available for combating Black Spot  
and Mildew on Roses, Grape Rot, Grape Mil-  
dew, Pear and Quince Blight, Tomato Blight,  
Carnation Rust and Red Spider.

## "ANT GAS"

Kills ants quickly. No fuss, no mess, and no  
dangerous, poisonous traps necessary. A tea-  
spoonful of Ant Gas poured on any ant hill  
kills *all* ants immediately. Catalog this sure-  
selling, long-profit item for 1933.

## "THRIP JUICE"

This concentrated spray goes further, costs  
less, has higher percentage of kill, and lasts  
longer than ordinary nicotine combinations.  
Kills Aphids, Thrips, red Spiders and other  
sucking insects.

## "PAINTS & PUTTIES"

For greenhouse use, including "Old Eng-  
lish" Liquid Putty, the original plastic. Ask  
for Price List on Paints and Putties. Ham-  
mond Paints and Putties are now priced for  
resale profits to you.

## "THE NEW PEST KIT"

A combination display  
package containing a can  
of slug shot for Chewing  
Insects, Thrip Juice as a  
contact insecticide, Grape  
and Rose Dust to control  
Fungus, a handy spray  
gun. Value \$1.25 to sell for  
95c. This is a real profit  
maker for you during 1933.

# —Ansul— COLLOIDAL SULPHUR

*The Most Effective Sulphur Fungicide  
Known for Fruits, Vegetables, Flowers,  
Ornamental Shrubs and Trees*

Ansul Colloidal Sulphur is  
effective against all the usual  
fungus and bacterial diseases  
of Fruits, Vegetables, Flow-  
ers, and Ornamental Shrubs  
and Trees, which  
can be controlled  
by spraying. It  
may be safely  
used throughout  
the entire grow-  
ing season.

Ansul Colloid-  
al Sulphur con-  
trols red spider  
and scale insects.

# Ansul FORMALDEHYDE DUST

A seed and soil treating compound,  
which controls seed-borne diseases, root  
rots and damping off of seedlings and  
cuttings. It saves growers the necessity  
of continually changing the sand in  
propagating benches.

The demand for these two money-  
saving and labor-saving materials for  
growers is steadily increasing all over the  
country. Alert dealers will profit by  
handling these two important, money-  
making items.

*Forward your name and  
address at once and permit  
us to send you retail and  
wholesale prices, together  
with the experience of impor-  
tant users all over the country.*

# Seed Sieves

For determining dockage the following can be used to advantage. Sieves are 8" x 8".

**TIMOTHY**  
1/25 zinc top  
6x32 wire mesh  
bottom.

**ALSIKE**  
1/20 zinc top.  
1/18 zinc top.  
26x26 wire mesh  
bottom.  
6x32 wire mesh  
bottom.

**RED CLOVER**  
1/15 zinc top.  
6x24 wire mesh.  
4x24 wire mesh.

**ALFALFA**  
1/15 zinc top.  
1/19 zinc top.  
4x26 wire mesh.

**SWEET CLOVER**  
7/64 zinc top for rough  
dockage.

1/15 zinc top for re-  
moving unhulled  
seed.

1/16 zinc top to re-  
move unhulled seed.  
4x24 wire mesh bottom  
for common sweet.  
4x26 wire mesh bottom  
for dwarf sweet.

## SEED BAG TRIERS

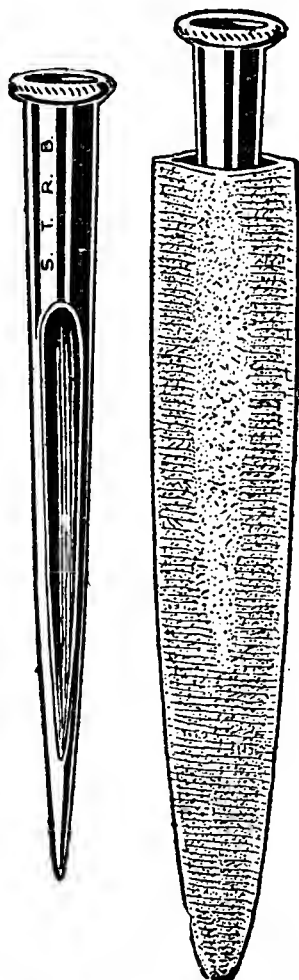

**QUICK, SAFE  
CONVENIENT**

Seed triers for quick, convenient drawing of samples without opening or tearing bag. Brass with steel point heavily nickel plated, with solid leather protector.

6 inches long,  
Price \$1.00 each,  
\$11.00 per doz.

9 in. long, with  
metal shield,  
Price \$2.00 each.

12 in. long, with  
metal shield,  
Price \$3.00 each.

**SEED TRADE REPORTING BUREAU**  
325 W. Huron St. CHICAGO, ILL.

## *Don't Buy* DIRT!

It is not necessary to buy weed seeds and inert matter when you have a set of our seed dockage sieves. You can determine for yourself the percentage of pure seed.

We can furnish an accurate set of sieves for each variety of field seed.

# Authorities Predict 1933 Banner Year for Poultry Industry

By EARL M. WHITNEY

**T**HE HISTORY of the poultry industry shows that it has always been very quick to adjust itself to changing conditions. That fact is again being proved as these lines are written. Up to January, 1932, this industry had not felt the depression to the degree that other farm products had been affected.

In January, however, there began a drop in egg and poultry meat prices that continued drastically downward until in late spring eggs were selling in some localities as low as 5c per dozen, the low mark of all time. Needless to say, at such prices poultry raising became very unprofitable and the poultry business of course was at a very low ebb. Fortunately this situation was of comparatively short duration. The late summer saw eggs back to normal prices, with the added advantage to the producer of very low feed costs. That condition has continued and many leading authorities in the poultry industry have gone on record to the effect that poultry farmers are facing a banner year in 1933. They emphasize the favorable low production costs which have failed to increase despite the steadily strengthening market toward fair prices for poultry products.

The exceedingly low egg price that existed in the late spring of 1932 had at least one good effect. It created an enormous market for eggs. Thousands upon thousands of people were eating eggs who would not have been able to afford them had not such a cheap price prevailed. No greater campaign could have been developed to create larger consumption of eggs had millions of dollars been spent in the effort. Economic conditions placed eggs within the reach of everyone. People were quick to take advantage of the situation. They became accustomed to having eggs, they found them nourishing and healthful. They liked them and it is safe to assume that they will continue to like them. Surely it is logical to believe that a custom thus developed will continue.

An improved financial situation which is already in sight at this writing, will enable these people to continue the habit they have formed of eating eggs. Therefore out of the depression has grown a greater potential egg market for the poultry farmer than it was deemed possible to develop even in the high tide of our greatest prosperity. Already there are signs of increased activity in poultry farming

to meet this greatly expanded demand for eggs. Thousands of people are buying stock with the idea of keeping at least enough laying hens to supply the home table with eggs. All of these people are prospective new customers for the dealer. They will buy baby chicks, feeds and equipment. They represent a big increase in business for the dealer during 1933. And those who have been in this business of raising poultry all along, are confronted with the necessity of expanding. There again is more business for the dealer.

Then too, the depression led many to do with the old equipment rather than replenish. The time has come now when all or most of this old equipment that has outlived its usefulness, must be replaced. With a rosy future assured, there will no longer be any hesitancy in buying the needed equipment to replace the old and likewise that required for expansion. That will be another source of increased business for the dealer in 1933.

During the period of the depression, live manufacturers availed themselves of the opportunity to improve and perfect their lines to a point where today so much improvement has been made that it is a matter of good business to supplant old equipment with the new, even though the old may be in good serviceable condition. As a matter of fact the keen competition of the present time actually compels the poultry farmer to use all of the new time and labor saving equipment. Much of all that is new in poultry supplies has a stronger influence on the health of the flock, a factor of vital importance to success.

Unquestionably there looms up an opportunity for volume business in poultry supplies for 1933. Someone is going to get that business in your community. The dealer that wants it will as surely have to take on the new, improved items that meet the requirements of the times. Upon the degree to which you prepare for this business will depend the volume of trade you obtain. The poultry department of SEED WORLD will be very glad to co-operate with you in preparing for these changed conditions.

Our service department can put you in touch with reliable and dependable sources of supply for the items it will be necessary to handle. Do not hesitate to call upon this publication for any advice or suggestions you may need. There is no charge for the service.

# CLO-TRATE

(CONCENTRATED COD LIVER OIL)

## for Poultry

In the manufacture of Clo-trate, a high grade cod liver oil is concentrated by the removal of vitamin free fats. The highly concentrated vitamin-bearing portion is then mixed with just enough of the oil to insure preservation of the vitamins and to permit uniform mixing with the feed. In no other way can so high a proportion of both vitamins A and D from cod liver oil be obtained with so small a quantity of fats.

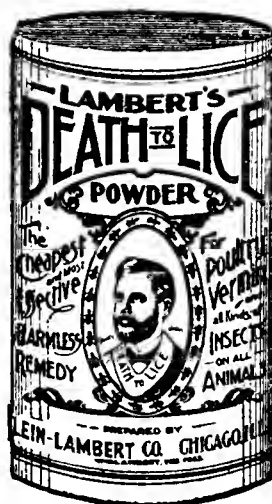

Ask us for complete details and prices.

## Seedsman Should Sell Feed Concentrates

**T**HE FARMER who grows corn, wheat and oats and is also raising chickens, feels that he should use as much of his own grain as possible for feed. To meet this situation and give to the farmer a balanced ration for his poultry flocks, many manufacturers have prepared concentrates to which the farmer can add home grown grains. These concentrates contain minerals, meat scraps, fish meal and liver oil, yeast and various other ingredients which the farmer would have to buy separately and then know the proper percentages to use in order to mix a balanced ration. By purchasing the

concentrate, the job is made easy as instructions for mixing are furnished by the manufacturer—all that is necessary is to follow the simple directions given and the farmer's problem of utilizing home grown grains is solved without detriment to the health and productivity of his birds.

Feed concentrates should sell well to the farming trade and dealers ought to handle a good concentrate that will help the farmers to solve their feeding problems at the lowest possible cost without harmful results.

## Window Displays Increase Sales

**T**HE POULTRY business offers the dealer an opportunity to liven up window displays to a degree that will not only increase poultry supply sales but other lines of merchandise as well. A window display of baby chicks or baby ducklings never fails to draw people into the store, where many other things of interest may be brought to their attention. There are many dealers who will tell you they have found the selling of chicks and ducklings profitable and at the same time emphasize the influence they have upon other business.

This practice can be carried along to

include growing pullets that have passed the danger age of the first eight weeks of chickhood. Many customers prefer to buy the pullets instead of chicks. All make a window attraction of a value that cannot be overestimated. In the case of growing pullets and matured birds, only a number sufficient for window purposes need be kept in the store. For orders, arrangements can be made with a reliable poultry farm to ship direct to your customers upon your order.

Try out this window display plan and you will be sold on its value as a result of your experience.

## Sell Poultry Leg and Wing Bands!

**S**CIENTIFIC poultry raising has come to stay. Unless scientific methods are practiced, failure results. One of the very definite requirements in scientific poultry raising is proper identification of birds so that pedigree records may be preserved. It is necessary to leg or wing band fowls so as to establish hereditary lines. This method is widely practiced and as a result there has grown a large volume of sales in these items.

Every dealer in poultry supplies should stock a complete line of bands for poultry.

An idea of the immense sale may be obtained in the activity of manufacturers of these items. One company operates several machines that turn out tens of thousands of these bands daily. A complete counter display card is furnished dealers that is very effective in making sales.

## World's Fair Will Have International Egg Laying Contest

The National Poultry Council will sponsor and operate an International Egg Laying Contest at the Chicago World's Fair. The contest will open May 1, 1933, and close October 29, 1933. One hundred houses, size 12' x 12', will contain two pens of 13 females each and a male bird—2,600 layers and 200 males in all.

This egg laying contest has been allotted an important location along Leif Erickson Drive, which is the main inner drive of the Exhibition grounds. It will occupy between two and three acres of land and will include a small hatchery from which baby chicks will be sold to visitors.

## Many Seedsmen Handle Beeware

Here is a profitable side line now handled by many of the best seed houses because it brings into their store customers for this specialty who also become purchasers of seeds. Let us tell you of our plan of direct mail which brings you buyers who have been going elsewhere for their seeds. We will supply names of satisfied seedsmen near you who consider Lewis Beeware indispensable. Warehouses near you to reduce transportation charges. Ask for our 1933 seedsmen plan.

## HOLE-IN-ONE PLANTING TOOLS

**"They Are Good"**  
(say dealers everywhere)

Because

- they are practical and simple
- we sell them in quantities
- they please our customers
- they make us real profit

**HOLE-in-ONE** tools make a hole in one operation. Thousands of them are being sold in conjunction with the sale of bulbs and the smaller potted plants.

Get in on this lucrative business NOW. Write for full information and free catalog cuts.

## Better bag ties— quicker, tighter.

Just bend the looped wire tie around neck of bag, hook tying tool into both loops and pull. Your bag is virtually sealed—can't be opened without detection. You save time, do a better job with

### GRIP-LOCK

*the foolproof*  
**SELF-LOCKING  
BAG SEAL**

The GRIP-LOCK is the very latest development in Bag Seals and is ideal for seedsmen's use. It prevents substitution and adulteration. After being once locked, relocking is impossible. It is also simple and easy to use as no machine is needed.

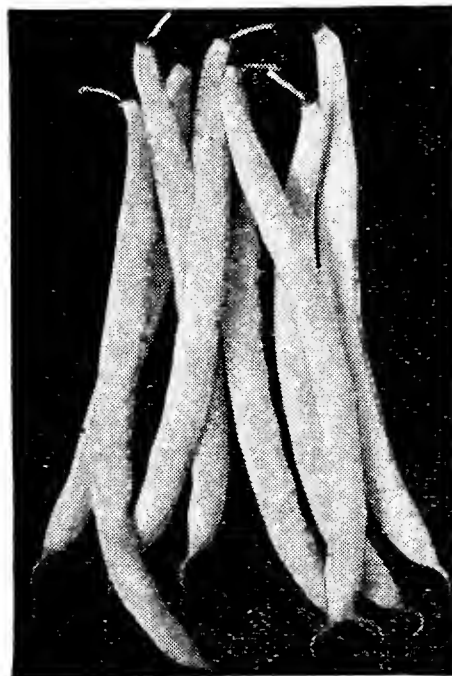

The lead pin bag seal SHOWN BELOW is another of the many types we manufacture for sealing seed bags.

## SEEDSMEN'S SUPPLIES—Continued

## POSTERS

Galloway Lithographing Co., Inc.  
San Francisco, Calif.  
**Genesee Valley Lithograph Co.**  
Rochester, N. Y.  
(See Adv. on Page 149)  
Morse Co., A. B.  
St. Joseph, Mich.  
Quality Print, Inc.  
Shelbyville, Ind.  
**Stecher Lithographic Co.**  
Rochester, N. Y.  
(See Adv. on Page 157)

## POULTRY FEED MACHINERY

**Howes Co., Inc., S.**  
Silver Creek, N. Y.  
(See Adv. on Page 155)  
Huntley Mfg. Co.  
Brocton, N. Y.  
National Packaging Machine Co.  
Newtonville, Boston, Mass.  
Savage Co., W. J.  
Knoxville, Tenn.  
Williams Patent Crusher & Pulv. Co.  
St. Louis, Mo.

## SAMPLE CASES

Hamilton Mfg. Co.  
Two Rivers, Wis.  
Heller & Co.  
Montpelier, Ohio  
Knickerbocker Case Co.  
Chicago, Ill.

## SAMPLE PANS

**Seed Trade Reporting Bureau**  
Chicago, Ill.  
(See Adv. on Pages 63-83)

## SCALES—AUTOMATIC

American Machine & Foundry Co.  
Brooklyn, N. Y.  
**Bronis, Jas.**  
New York, N. Y.  
(See Adv. on Page 155)  
Exact Weight Scale Co., The  
Columbus, Ohio  
Fairbanks, Morse & Co.  
Chicago, Ill.  
Ferguson Co., J. L.  
Joliet, Ill.  
**Howes Co., Inc., S.**  
Silver Creek, N. Y.  
(See Adv. on Page 155)  
National Packaging Machine Co.  
Newtonville, Boston, Mass.  
Richardson Scale Co.  
Clifton, N. J.  
Stokes & Smith Co., The  
Philadelphia, Pa.  
Toledo Scale Co.  
Toledo, Ohio  
Triner Sales Co.  
Chicago, Ill.

## SCALES—COUNTER or PLATFORM

**Bronis, Jas.**  
New York, N. Y.  
(See Adv. on Page 155)  
Consolidated Packaging Mach. Corp.  
Buffalo, N. Y.  
Exact Weight Scale Co., The  
Columbus, Ohio  
Fairbanks, Morse & Co.  
Chicago, Ill.  
**Howes Co., Inc., S.**  
Silver Creek, N. Y.  
(See Adv. on Page 155)  
**Seed Trade Reporting Bureau**  
Chicago, Ill.  
(See Adv. on Page 163)  
Toledo Scale Co.  
Toledo, Ohio  
Torsion Balance Co.  
New York City  
**Troemner Co., Henry**  
Philadelphia, Pa.  
(See Adv. on Page 153)

## SCALES—LABORATORY

**Bronis, Jas.**  
New York, N. Y.  
(See Adv. on Page 155)  
Kny Scheerer Corp. of America  
New York City, N. Y.  
**Seed Trade Reporting Bureau**  
Chicago, Ill.  
(See Adv. on Page 163)  
Torsion Balance Co.  
New York City, N. Y.  
**Troemner Co., Henry**  
Philadelphia, Pa.  
(See Adv. on Page 153)

## SCARIFIERS

Allis-Chalmers Mfg. Co.  
Milwaukee, Wis.  
Cleland Mfg. Co.  
Minneapolis, Minn.  
Duflecto Mfg. Co.  
Nevada, Iowa  
Eddy Seed Cleaners, Ltd.  
Toronto, Ont., Canada  
Ferrell & Co., A. T.  
Saginaw, Mich.  
**Howes Co., Inc., S.**  
Silver Creek, N. Y.  
(See Adv. on Page 155)  
Jensen, P. E.  
Nevada, Iowa  
Savage Co., W. J.  
Knoxville, Tenn.

## SCREENS

Cleland Mfg. Co. (Sieves)  
Minneapolis, Minn.  
Erdle Perforating Co.  
Rochester, N. Y.  
**Howes Co., Inc., S.**  
Silver Creek, N. Y.  
(See Adv. on Page 155)  
Huntley Mfg. Co.  
Brocton, N. Y.  
**Seed Trade Reporting Bureau**  
Chicago, Ill.  
(See Adv. on Page 129)  
**Sutton, Steele & Steele, Inc.**  
Dallas, Texas  
(See Adv. on Page 19)

## SEALS

**Brooks Co., E. J.**  
Newark, N. J.  
(See Adv. on Page 147)  
**Porter Safety Seal Co.**  
Chicago, Ill.  
(See Adv. on Page 155)  
**St. Regis Paper Co.**  
New York, N. Y.  
(See Adv. on Page 147)

## SEED CASES

Heller & Co.  
Montpelier, Ohio  
Manitowoc Building Supply Co.  
Manitowoc, Wis.  
Walker Bin Co.  
Penn Yan, N. Y.

## SEED CORN TESTERS

Baier Bros. Mfg. Co.  
Cissna Park, Ill.  
Martin Co., The  
Des Moines, Iowa

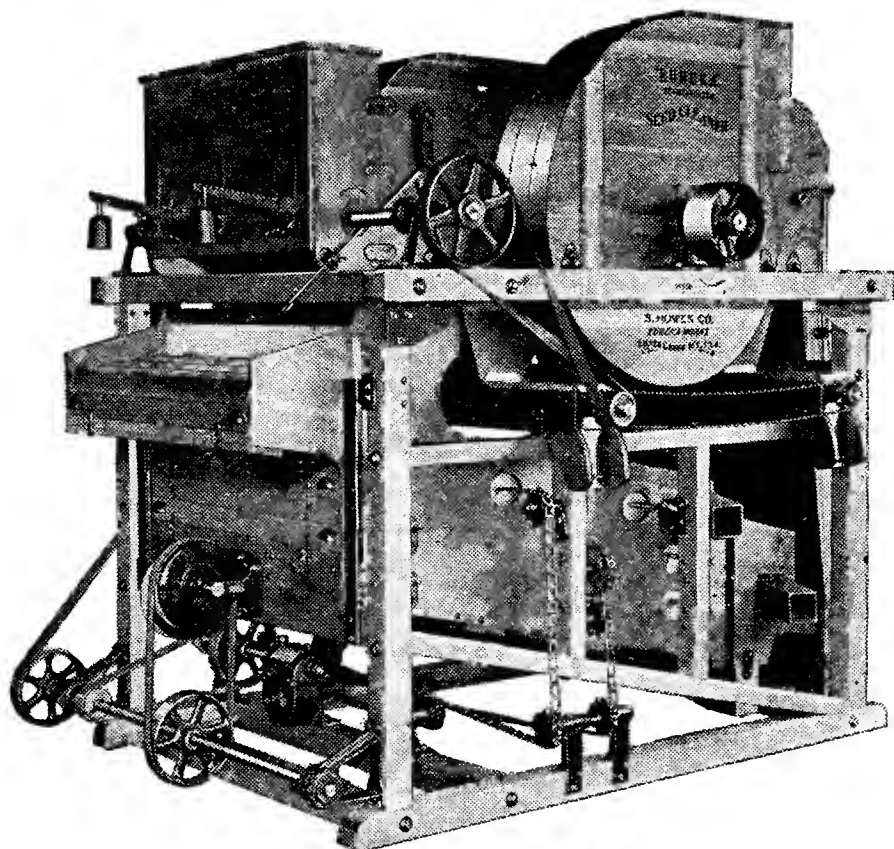

## SEED DRIERS

Ellis Drier Works  
Chicago, Ill.  
**Howes Co., Inc., S.**  
Silver Creek, N. Y.  
(See Adv. on Page 155)  
Martin Co., The  
Des Moines, Ia.  
Randolph Co., O. W.  
Toledo, Ohio  
Richards & Sons, Ross V.  
North Manchester, Ind.

*The Last Word in Improved Seed Cleaners*

# Eureka Standardized Seed Cleaner

PERFECT air separations.

ACCURATE and UNI-FORM sieve separations, secured by the Buhler Drive.

EFFICIENT and SIMPLE sieve cleaners.

BALL BEARINGS throughout.

*Look up this IMPROVED Cleaner.*

NEW YORK CITY, N. Y.

**PROTECT YOUR  
SEED  
SHIPMENTS**

**The Porter Safety Seal—  
"The Seal That Seals"**

Gives positive assurance against adulteration or substitution.

Meets every requirement of the P. O. Dept. and is universally used by banks for sealing shipments of coin and currency.

The Porter Safety Seal is the invention of Capt. Thos. I. Porter of the U. S. Secret Service. With one simple operation the pin is forced into folded neck of bag and cord is pulled tight. The seal is compressed, imprinting your name and address and crimping seal, thus sealing the bag securely in such a manner that it cannot be opened without destroying the seal or leaving unmistakable evidence of tampering.

Sample sealed bag and full information sent on request.

**Porter Safety  
Seal Co.**

269 N. California Av.  
Chicago

## SEEDSMEN'S SUPPLIES—Concluded

## SEED ENVELOPE SEALERS

Stokes & Smith Co., The  
Philadelphia, Pa.

# *Reader Interest*

in

# *Seed World*

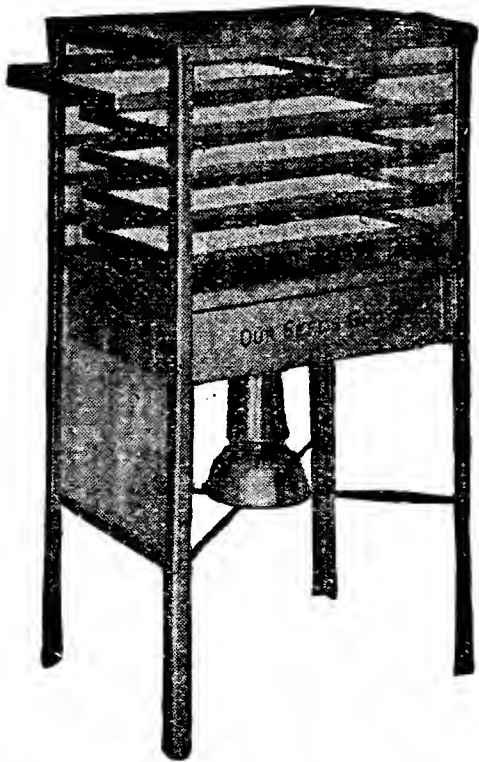

The preceding five pages outline the most important articles which appeared in Seed World during 1932. Copies of any particular issue (while supply is available) may be procured (price 15 cents) by writing

## SEED WORLD

325 W. Huron St.

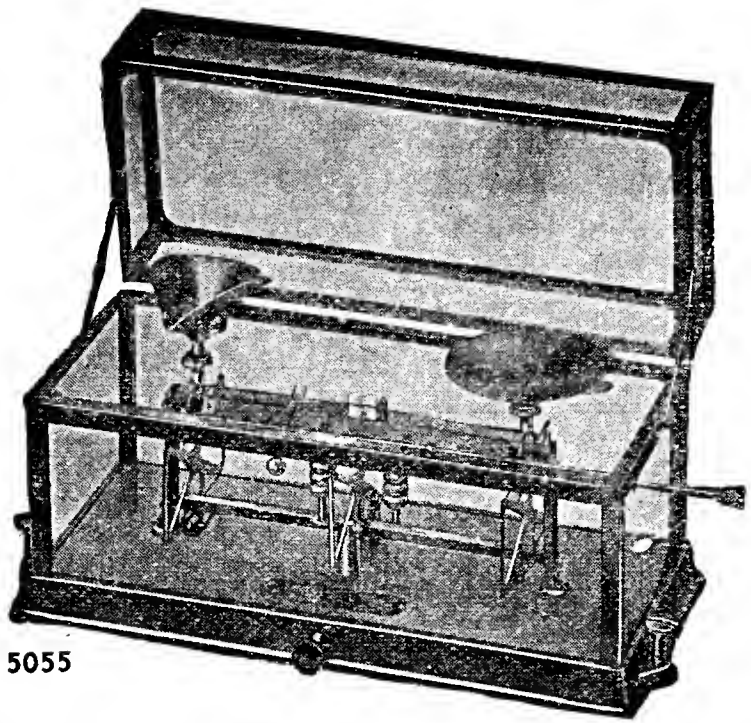

Chicago, Illinois

# Seed Testing Equipment

## Sho-Gro Germinators

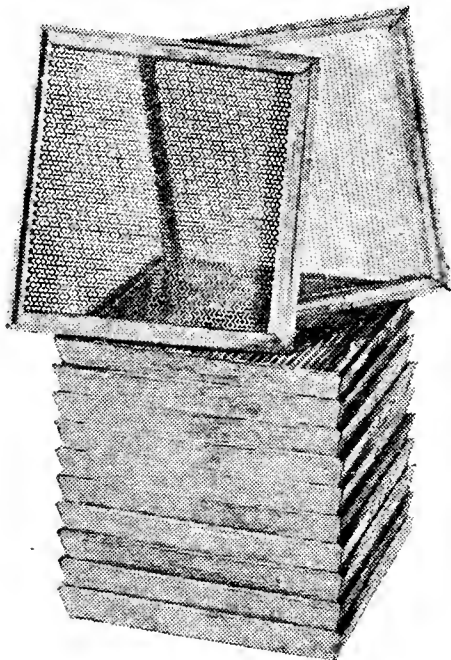

are Rapid—Reliable—Reasonable. Durablely made with glass sides—it is efficient, accurate and makes an attractive display of sprouting seeds that will interest your customers. Blotters are kept moist by evaporation. Has 5 trays 10 x 15 in. Electric or lamp heat. Price with oil heat, \$23.00. Electric (100 or 220 volts), \$30.00. Shipping weight, 95 lbs.

5055

## Torsion Scale No. 5055

A fine balance for delicate weighing and the analysis of seed and grain. Capacity 120 grams, sensitiveness 2 milligrams. Rider beam 1 gram by .01 gram or if specified, 500 milligrams by 5 milligrams. Size 13x8 $\frac{1}{4}$ x6 $\frac{1}{2}$  inches. Brass weighs in mahogany case 2-20 grams to 1 gram. Price, \$82.00.

## Seed Dockage Sieves

For CLOVERS, TIMOTHY and other SEEDS of SIMILAR SIZES

These sieves are correctly made in every particular. The size of the perforations—the accuracy of the construction—the strength—material and workmanship are SEEDBURO quality throughout.

The complete set consists of 12 sieves and solid bottom pan, as follows:

Seven of the sieves have zinc bottoms, with round perforations in size—1/25, 1/20, 1/18, 1/15, 1/19, 7/64, 1/16. Five have woven wire mesh in sizes—6/32, 26/26, 6/24, 4/24, 4/26.

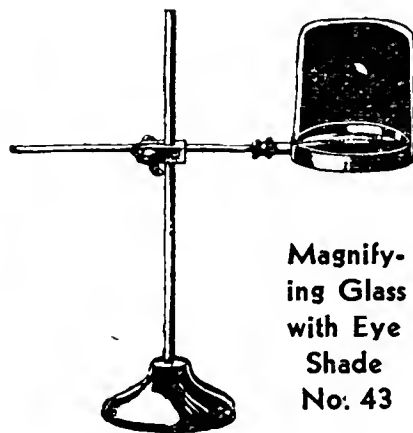

Price, \$10.00 for complete set.

Write for full descriptive matter on all seed testing equipment

## SEED TRADE REPORTING BUREAU

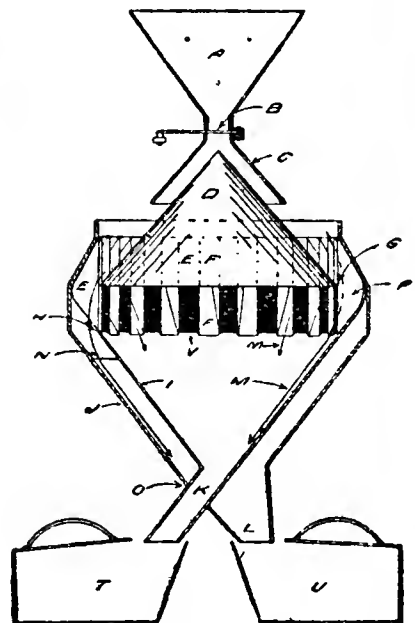

325 W. HURON STREET

CHICAGO, ILL.

Magnifying Glass with Eye Shade No. 43

This 3 in. glass and stand will be found very practical for examining grain and seed samples. The glass is held rigid on the stand and is easily adjusted to any angle or position. The eye shield is removable. Has heavy metal base, shipping weight, 4 lbs. Price, each, \$8.00.

## The Boerner Sampler

is of great benefit in securing reliable samples of seed. Mixes seed thoroughly and divides into two equal parts, securing as small a sample as is desired by repeated operation. No power required. Made of brass in exact accordance with Government specifications. Price, \$35.00. Shipping weight, 18 lbs.

# LEONARD SEED COMPANY

CHICAGO, ILLINOIS

We are growers of selected strains of the new and best types — specially adapted for use by the Quality Grower:

## BEANS

Disease free and disease resistant strains.

## SWEET CORN

New hybrid and standard types.

## PEAS

Resistant Strains.

## TOMATOES

Wilt Resistant Strains

and other Garden Seeds. Also Onion Sets —  
Leonard's Seedman's Stock.

Contracting now for spot and future — Price lowest  
in a decade for first quality Seed.

Write us before you place your order.

PEAS

BEANS

Quality crops can only be raised from quality seeds. A dealer's success depends entirely upon the quality of seed and merchandise he sells his community. Quality seed has been the key-note of the success of Rogers Bros. 1876 to 1932.
